FOREWORD

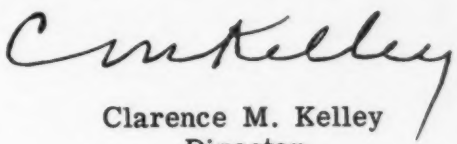
Cooperation is the hallmark of the Uniform Crime Reporting Program. I have been associated with this Program for many years as a Chief of Police and as the Director of the FBI, and I firmly believe that it continues to be an invaluable aid to law enforcement. Its success is due primarily to the joint efforts of the more than 12,000 city, county, and State law enforcement agencies that furnish the data for the Program.

While the information provided law enforcement through this Program serves as an administrative and operational tool, it also serves as a measure of certain aspects of our society. The Uniform Crime Reporting Program reveals the extent of criminal activity in our land. This activity has reached such proportions that Americans throughout the Nation consider crime their community's most serious problem. It will require the full resources of law enforcement at all levels of government to deal effectively with this menace. But our profession will be unable to cope effectively with the problem of crime without the support of every responsible citizen.

In my more than thirty years in law enforcement, I have become convinced that if anyone is capable of energizing people to work against crime, it is those of us in the law enforcement community. We must make known our alarm about crime. We must convey the message that crime erodes the very foundation of our Nation.

To this end, the FBI is participating in Crime Resistance Programs designed to involve citizens in the fight against crime. With the spirit of cooperation so evident in today's law enforcement community, I am sure we will see results. We must resolve to lead the attack against this Nation's number one concern. All of us in law enforcement must recognize that the more friends we have and the better understanding the public has of our work, the more effective we will be in the fight against crime.

Efforts such as the Uniform Crime Reporting Program can enable us to better serve the Nation. We must keep the public, our civic leaders, and the legislators at all levels of government informed as to the seriousness of crime. Only through such enlightenment will we in law enforcement receive the support and cooperation so necessary to carry out our responsibilities.



Clarence M. Kelley
Director

Crime Factors

Crime is a social problem and the concern of the entire community. The law enforcement effort is limited to factors within its control.

Uniform Crime Reports gives a nationwide view of crime based on police statistics voluntarily contributed by local law enforcement agencies. The factors which cause crime are many and vary from place to place throughout the country. The reader of this publication is cautioned against comparing statistical information of individual communities solely based on a similarity in their population counts. Population is only one of many factors which must be considered in a comparative study of crime. Some of the conditions which affect the volume and type of crime that occurs from place to place are briefly outlined as follows:

Density and size of the community population and the metropolitan area of which it is a part.

Composition of the population with reference particularly to age, sex, and race.

Economic status and mores of the population.

Stability of population, including commuters, seasonal, and other transient types.

Climate, including seasonal weather conditions.

Educational, recreational, and religious characteristics.

Effective strength of the police force.

Standards of appointments to the local police force.

Policies of the prosecuting officials.

Attitudes and policies of the courts and corrections.

Relationships and attitudes of law enforcement and the community.

Administrative and investigative efficiency of law enforcement, including degree of adherence to crime reporting standards.

Organization and cooperation of adjoining and overlapping police jurisdictions.

Section 1

Summary

SUMMARY OF UNIFORM CRIME REPORTING PROGRAM

Uniform Crime Reports provides a nationwide view of crime based on the submission of police statistics by city, county, and state law enforcement agencies throughout the country. The extent of coverage as demonstrated by this publication is a tribute to the cooperative and dedicated spirit of the law enforcement community in this country.

Historical Background

The Uniform Crime Reporting Program is the outgrowth of a need for a national and uniform compilation of law enforcement statistics. A voluntary national Program of collection of crime counts was initiated in 1930 by the Committee on Uniform Crime Records of the International Association of Chiefs of Police (IACP). In that same year, the Federal Bureau of Investigation (FBI) was authorized by the Congress of the United States to serve as the national clearinghouse for statistical information on crime. Crime reports are obtained from law enforcement agencies throughout the Nation based on uniform classifications and procedures of reporting. Information regarding crime is available to law enforcement in a variety of data spheres, e.g., offenses, arrests, prosecutions, convictions, and confinements. In an effort to provide as complete a picture of crime in the United States as possible, the Committee on Uniform Crime Records of the IACP chose to obtain data on offenses that became known to police. Greater numbers of these data were available than in any other category of reportable crime information. A meaningful overview of crime was available through examination of seven offenses which were selected because of their seriousness, frequency in occurrence, and likelihood of being reported to police. These offenses, known as the Crime Index offenses, are murder, forcible rape, robbery, aggravated assault, burglary, larceny-theft, and motor vehicle theft. To provide for uniformity nationwide in the reporting of these offenses, standardized definitions were adopted. This standardization was necessary to overcome the variations in definitions of criminal offenses in the states and localities. Reporting agencies are required to interpret local criminal acts and law violations in the context of these definitions prior to submission of their counts to the FBI. The Uniform Crime Reporting definitions of these offenses are set forth later in this section. Because of the differences among the state codes, there is no possibility in a Program such as this to distinguish between crimes by designations such as "felony" or "misdemeanor."

The Committee on Uniform Crime Records, IACP, continues to serve in an advisory capacity to the FBI in the operation of this Program. In this connection, the IACP plays an active and effective part in quality control through surveys of police records and crime reporting systems. Dr. Peter P. Lejins, Director, Institute of Criminal Justice and Criminology, University of Maryland, College Park, Maryland, continues as a consultant to the FBI in the conduct of this Program.

The National Sheriffs' Association (NSA) in June, 1966, established a Committee on Uniform Crime Records to serve in an advisory capacity to the NSA membership and the national Uniform Crime Reporting Program. This Committee actively encourages sheriffs throughout the country to fully participate in this important Program.

Committees on Uniform Crime Reporting within state law enforcement associations are active in promoting interest in the Uniform Crime Reporting Program, fostering widespread and more intelligent use of uniform crime statistics, and lending assistance to contributors when the need exists.

In recent years, the FBI has actively assisted individual states in the development of statewide programs of police statistics compatible with the national system. These state statistical programs provide the advantage of increased coverage of law enforcement agencies due to state mandatory

reporting requirements. The state systems also can provide direct and frequent service to law enforcement agencies in assuring completeness and quality of information provided by them. Through coordination by the state data collection agency, information is more readily available for the use of the state. The collection and reporting machinery for the national Program also is substantially streamlined.

With the development of state Uniform Crime Reporting Programs, the FBI ceases collection of data directly from individual law enforcement agencies within the state. Completed information from these agencies is forwarded to the national Program through the state Uniform Crime Reporting collection agency. As of July 1, 1975, there were 32 states operating Uniform Crime Reporting Programs. These include Arizona, Arkansas, California, Delaware, Florida, Georgia, Hawaii, Idaho, Illinois, Iowa, Kansas, Kentucky, Louisiana, Maine, Maryland, Michigan, Minnesota, Nebraska, Nevada, New Jersey, New Mexico, New York, North Carolina, Oklahoma, Oregon, Pennsylvania, Rhode Island, South Carolina, Tennessee, Virginia, West Virginia, and Wisconsin. Several other states are in various stages of development. The conditions under which these systems are developed provide for consistency and comparability in the data submitted to the national Program. They also permit regular and timely reporting of the national crime data. These conditions are:

(1) The state Program must conform to the national Uniform Crime Reports standards, definitions, and information required. This, of course, does not prohibit the state from collecting other statistical data beyond the national collection. (2) The state criminal justice agency must have a proven, effective, mandatory, statewide Program and have instituted acceptable quality control procedures. (3) Coverage within the state by a state agency must be, at least, equal to that attained by national Uniform Crime Reports. (4) The state agency must have adequate field staff assigned to conduct audits and to assist local units in record practices and crime reporting procedures. (5) The state agency must furnish to the FBI all of the detailed data regularly collected by the FBI in the form of duplicate returns, computer printouts, and/or magnetic tape. (6) The state must have the proven capability (tested over a period of time) to supply all the statistical data required to the FBI in time to meet national Uniform Crime Reports publication deadlines. (7) The FBI will continue its internal procedures of verifying and reviewing individual agency reports for both completeness and quality. (8) The FBI will continue to have direct contact with individual reporting units within the state where necessary in connection with crime reporting matters, but will coordinate such contacts with the state agency. (9) Upon request, the FBI will continue its training programs within the state with respect to police records and crime reporting procedures. For mutual benefit these will be coordinated with the state agency. (10) Should circumstances develop whereby the state agency cannot provide the data required by the national Program, the FBI will reinstitute a direct collection of Uniform Crime Reports from law enforcement agencies within the state.

Objectives of Uniform Crime Reporting

The fundamental objective of the Uniform Crime Reporting Program is to produce a reliable set of criminal statistics on a national basis for use in law enforcement administration, operation, and management. This compiled data is also intended for the use and information of other professionals and scholars who have an interest in the crime problem. At the same time, this information is important as a reference source for the public as an indicator of the crime factor in our society.

The means utilized to attain these objectives are:

(1) To measure the extent, fluctuation, distribution, and nature of serious crime in the United States through presentation of data on the seven Crime Index offenses.

(2) To measure the total volume of serious crime known to police.

(3) To show the activity and coverage of law enforcement agencies through arrest counts and police employee strength data.

Reporting Procedure

In the national Uniform Crime Reporting Program, contributing law enforcement agencies are wholly responsible for compiling their own crime reports and submitting them to the FBI. The FBI, in an effort to maintain quality and uniformity in the data received, furnishes to the contributing agencies, upon their request, training in Uniform Crime Reporting procedures. All

contributors, also, are furnished with the *Uniform Crime Reporting Handbook* which outlines, in detail, procedures for scoring and classifying offenses. The Handbook illustrates and discusses the monthly and annual reporting forms as well as the numerous tally forms made available to facilitate the periodic tabulation of desired data.

The publication of the Uniform Crime Reporting "Newsletter," which was initiated in October, 1963, has continued with issues published when pertinent. This "Newsletter" is utilized to explain revisions in the Program as well as to present information and instructional material to assist contributors.

A centralized record system is necessary to the sound operation of any law enforcement agency. The record system is an essential basis for crime reporting by the agency. The FBI makes available upon request to any law enforcement agency the *Manual of Police Records*, which can serve as a guide in the establishment or modification of a basic, nonautomated police record system. Special Agents of the FBI are utilized to encourage new Uniform Crime Reporting contributors and to assist them in the established reporting procedures of Uniform Crime Reporting.

On a monthly basis, law enforcement agencies (police, sheriffs, and state police) report the number of offenses that became known to them during the month in the following crime categories: murder and nonnegligent manslaughter, manslaughter by negligence, forcible rape, robbery, assault, burglary, larceny-theft, and motor vehicle theft. This count is taken from a record of all complaints of crime received by the law enforcement agency from victims, other sources, and/or discovered by officers. Whenever complaints of crime are determined through investigation to be unfounded or false, they are eliminated from the actual count. The number of "actual offenses known" in these crime categories is reported to the FBI whether or not anyone is arrested for the crime; the stolen property is recovered; prosecution is undertaken; or any other restrictive consideration is in effect. Law enforcement agencies, on a monthly basis, report the total number of these reported crimes which they clear either by arrest or exceptional means. A separate count of crimes cleared which involve only persons under the age of 18 is shown. The number of law enforcement officers killed and assaulted and the value of property stolen and recovered during the month are also reported.

Arrests are reported monthly for all criminal acts, except traffic violations, by crime category and include the age, sex, and race of each person arrested. A report is also submitted on an annual basis concerning the number of persons formally charged by crime classification and the disposition of such charges.

In January, 1972, a monthly collection in the national Program was instituted concerning the number of law enforcement officers assaulted by type of duty assignment. Additional information is collected relative to the type of weapon used, the circumstances of the assault, and whether the victim officer sustained injury.

Law enforcement employee data specifically encompass the number of full-time sworn officers and other personnel. This information is collected as of October 31 of each calendar year.

State Uniform Crime Reporting Programs are encouraged to maintain the same method and scope of data for a reasonable period before expanding their efforts.

Reporting Area

During calendar year 1974, crime reports were received from law enforcement agencies representing 97 percent of the United States population living in the standard metropolitan statistical areas, 91 percent of the population in other cities, and 81 percent of the rural population. The combined coverage accounts for 94 percent of the total national population.

Presentation of crime data by areas, as used in this publication, follows as closely as practical the definitions used by the Office of Management and Budget and the Bureau of the Census for standard metropolitan statistical areas and other cities. There is, however, some deviation insofar as the rural area is concerned. For crime reporting purposes rural is generally the unincorporated portion of a county outside of standard metropolitan statistical areas. In addition, statistics are presented in certain tables relative to "suburban" areas. A suburban area consists of cities with population less than 50,000 together with counties which are within a standard metropolitan statistical area. In this use of suburban, the major core city is, of course, excluded. The suburban area concept is used because of the particular crime conditions which exist in these communities surrounding the major core cities.

A standard metropolitan statistical area is generally made up of a core city with a population

of 50,000 or more inhabitants and the surrounding county or counties which share certain metropolitan characteristics. In New England, "town" instead of "county" is used to describe standard metropolitan statistical areas. These towns do not coincide generally with established reporting units; therefore, metropolitan state economic areas in New England are used in these areas' tabulations since they encompass an entire county or counties. Standard metropolitan statistical areas, as used in this publication, make up approximately 73 percent of the total United States population.

"Other cities" are urban places outside standard metropolitan statistical areas. Most of these places are incorporated and comprise 11 percent of the 1974 population. Rural areas are made up of the unincorporated portions of counties outside of urban places and standard metropolitan statistical areas and represent 16 percent of our national population. Throughout this Program, sheriffs, county police, and many state police report on crimes committed within the limits of the counties but outside cities while local police report on crime committed within the city limits (urban places).

Verification Procedures

Uniformity of crime data collected under this Program is of primary concern to the FBI as the national clearinghouse. With the receipt of reports covering over 11,000 jurisdictions, the problems of attaining uniformity are readily apparent. Issuance of instructions does not complete the role of the FBI. On the contrary, it is standard operating procedure to examine each incoming report not only for arithmetical accuracy but also, and possibly of even more importance, for reasonableness as a possible indication of error.

Variations in the level and ratios among the crime classes established by previous reports of each agency are used as a measure of possible or probable incompleteness or changes in reporting procedures. Necessary arithmetic adjustments or unusual variations are brought to the attention of the submitting agency by correspondence. During 1974, communications were addressed to contributors primarily as a result of editing and evaluation processes. Correspondence with contributors and state Uniform Crime Reporting Programs is the principal tool for supervision of quality. Not only are individual reports studied, but also periodic trends for individual reporting units are prepared. Crime rates for all units are grouped for general comparability to assist in detecting variations and fluctuations possibly due to some reason other than chance. For the most part, the problem is one of keeping the contributors aware of the type of information necessary for the success of this Program.

The effort to eliminate duplication in crime reporting by the various agencies is given constant attention. In addition to detailed instructions as to the limits of reporting jurisdictions between sheriffs and police in urban places, lists of urban places by county are furnished to sheriffs, county police, and in some instances state police organizations upon request.

The FBI schedules Uniform Crime Reporting seminars and workshops throughout the country for law enforcement personnel. Contacts by Special Agents of the FBI are utilized to enlist the cooperation of new contributors and to explain the purpose of this Program and the methods of assembling information for reporting. When correspondence, including specially designed questionnaires, does not elicit a response, Special Agents may be directed to visit the contributor to satisfactorily resolve the misunderstanding.

Variations from the desired reporting standard which cannot be resolved by the steps indicated above are brought to the attention of the Committee on Uniform Crime Records of the IACP. The Committee may designate a representative to make a personal visit to the agency to cooperatively assist in a needed revision of records and reporting methods.

Regardless of the extent of the statistical verification processes used by the FBI, the accuracy of the data assembled under this Program depends upon the sincere effort exerted by each contributor to meet the necessary standards of reporting. For this reason, the FBI is not in a position to vouch for the validity of individual agency reports.

The Crime Totals

Communities not represented by crime reports are relatively few. An examination of the tables found in this document show 1974 crime totals for the Index classifications and the extent of coverage of the data for a particular table. The FBI conducts a continuing Program to further reduce the unreported areas. The continuing development and implementation of mandatory

state Uniform Crime Reporting Programs will virtually eliminate unreported areas.

Within each of the three areas—standard metropolitan statistical, other urban, and rural—it is assumed that the unreported portion had the same proportionate crime experience as that for which reports were received. Estimates for unreported areas are based on the reported crime experience of similar areas. Certain refinements are made in this basic estimating procedure as the need arises.

Crime Trends

Crime data for trends are homogeneous to the extent that figures from similar reporting units, on the basis of population, are used for each of the periods tabulated. In all trend tabulations, only those reporting units are used which have provided comparable data for the period under consideration. National, geographic, and area trends are always established on the basis of two consecutive years. Exclusions from trend computations are made when figures from a reporting unit are obviously inaccurate for any period or when it is ascertained that unusual fluctuations are due to such variables as improved records procedures.

As a matter of standard procedure, crime trends for individual places are analyzed five times a year by the FBI. Any significant increase or decrease is made the subject of a special inquiry with the contributing agency. In 1974, for example, approximately 3,000 letters were sent to police administrators of contributing agencies inquiring as to the reason for significant increases or decreases in pertinent crime classifications. The communication containing this inquiry specifically directs attention to possible changes in records or reporting procedures. When it is found that crime reporting procedures are in part responsible for the difference in the level of crime, the figures for specific crime categories or totals are excluded from the trend tabulations. Year-to-year trends in Uniform Crime Reports are valid and may be used to reasonably establish long-term trends as well as to reestimate crime volume and reconstruct crime trends for prior years. It can be assumed, logically, that the current year is the most complete in terms of volume. Trend or percent change as established by comparable units for each two-year period is then applied as the basis for reestimating the volume of crime for prior years.

On the other hand, crime rate tables by state and standard metropolitan statistical area contain the most reliable reports available for the current year, and care should be exercised in any direct comparisons with prior issues. Changes in crime level may have been due in part to improved reporting or records procedures rather than to chance.

Population Data

In computing crime rates by state, geographic division, standard metropolitan statistical area, and the Nation as a whole, population estimates released by the Bureau of the Census on July 1, 1974, were used. Population estimates for individual cities and counties were prepared using special census reports, state sources and estimates, commercial sources, and extrapolation where no other estimate was available. Complete 1974 population estimates for individual cities and counties were used from 17 states while official sources in other states provided limited data which was used selectively. The estimated United States population increase in 1974 was 1 percent over 1973 according to the figures published by the Bureau of the Census.

Recent Developments in Uniform Crime Reporting

Since 1958, "larceny $50 and over in value" has been a Crime Index offense. The problem of dollar valuation of larceny has been the subject of discussion in the Committee on Uniform Crime Records meetings since 1963. During recent years, the Committee has considered modification in the definition of this offense due to problems of evaluation of stolen property and inflation factors in the $50 value which is basic to the definition of this offense. The Committee and the FBI have had mutual concern in this matter and have jointly discussed a variety of possible solutions including increasing the dollar valuation from $50 to some higher dollar value. This suggestion was seen as only a temporary solution to the problem. In the latter part of 1972 consideration by the FBI, the Committee, the operating state programs, and several large city police departments resulted in the adoption of "total larceny-theft" as a replacement for the Crime Index offense of "larceny $50 and over in value." This new classification includes the total number of larceny-theft offenses known to police without regard to value. The Index offense of "total larceny-theft" was instituted as of January, 1973. Information appearing in Table 2 reflects appropriate adjustments in estimated Crime Index data, 1960–1974.

The IACP Committee on Uniform Crime Records adopted certain changes in the Program which were instituted in January, 1974. Due to law enforcement's concern over the robbery problem, an expansion of the sub-breakdowns of robbery incidents was adopted. Prior to 1974, robbery was viewed as either armed or strong-armed. The breakdowns for 1974 information were firearm, knife or cutting instrument, other dangerous weapons, and strong-arm. The collection of the data in this fashion will enhance the specificity of type of weapon used in this crime.

The category of auto theft was renamed motor vehicle theft in 1974. To more fully present this problem, law enforcement has been asked to provide the type of vehicle stolen in three categories: autos, trucks and buses, and other vehicles.

In the past, the collection of Value of Property Stolen data was limited to the offenses of Robbery, Larceny-theft, Burglary, and Motor Vehicle Theft. In January, 1974, the Program expanded this collection for the offenses of Homicide and Forcible Rape. The collection of this additional information projects a more accurate and well-rounded picture of the monetary loss suffered by the victims of crimes in the United States in relation to the Index offenses.

Also instituted in January, 1974, was a revised collection of supplementary data for the offense of Larceny-theft. Previously, this was broken down into increments of monetary values of under $5, $5 to $50, and over $50. The present system collects the data in monetary values of under $50, $50 to $200, and over $200.

The Committee, in its February, 1974, meeting, adopted a revised collection format for Stolen Property by Type and Value. The breakdown format for the 1975 collection is: (A) Currency, Notes, Etc.; (B) Jewelry and Precious Metals; (C) Clothing and Furs; (D) Locally Stolen Motor Vehicles; (E) Office Equipment; (F) Televisions, Radios, Cameras, Etc.; (G) Firearms; (H) Household Goods; (I) Consumable Goods; (J) Livestock; (K) Miscellaneous. The changes took effect January 1, 1975.

The first national State Uniform Crime Reporting Program Conference was held on June 23–26, 1975, at the FBI Academy at Quantico, Virginia. Invited to the Conference were representatives from all State Uniform Crime Reporting Programs, as well as the Committee on Uniform Crime Records of the IACP and the Uniform Crime Reporting Committee of the National Sheriffs' Association. Regional Directors of the Law Enforcement Assistance Administration and representatives of IACP Headquarters were in attendance.

General assembly and workshop sessions highlighted the need for cooperative efforts on the part of all those concerned with the crime problem in the United States. Numerous ideas and proposals were exchanged to better enhance and improve the Uniform Crime Reporting Program.

Offenses in Uniform Crime Reporting

Offenses in Uniform Crime Reporting are divided into two groupings designated as Part I and Part II offenses. Crime Index offenses are included among the Part I offenses. Offense and arrest information is reported for the Part I offenses on a monthly basis, whereas only arrest information is reported for Part II offenses.

The Part I offenses are as follows:

1. **Criminal homicide.**—(a) Murder and nonnegligent manslaughter: All willful felonious homicides as distinguished from deaths caused by negligence. Excludes attempts to kill, assaults to kill, suicides, accidental deaths, or justifiable homicides. Justifiable homicides are limited to: (1) The killing of a person by a law enforcement officer in line of duty; and (2) The killing of a person in the act of committing a felony by a private citizen. (b) Manslaughter by negligence: Any death which the police investigation established was primarily attributable to gross negligence of some individual other than the victim.

2. **Forcible rape.**—The carnal knowledge of a female, forcibly and against her will in the categories of rape by force, assault to rape, and attempted rape. Excludes statutory offenses (no force used—victim under age of consent).

3. **Robbery.**—Stealing or taking anything of value from the care, custody, or control of a person by force or by violence or by putting in fear, such as strong-arm robbery, stickups, armed robbery, assaults to rob, and attempts to rob.

4. **Aggravated assault.**—Assault with intent to kill or for the purpose of inflicting severe bodily injury by shooting, cutting, stabbing, maiming, poisoning, scalding, or by the use of acids, explosives, or other means. Excludes simple assaults.

5. **Burglary—breaking or entering.**—Burglary, housebreaking, safecracking, or any breaking or unlawful entry of a structure with the intent to

commit a felony or a theft. Includes attempted forcible entry.

6. **Larceny–theft (except motor vehicle theft).**—The unlawful taking, carrying, leading, or riding away of property from the possession or constructive possession of another. Thefts of bicycles, automobile accessories, shoplifting, pocket-picking, or any stealing of property or article which is not taken by force and violence or by fraud. Excludes embezzlement, "con" games, forgery, worthless checks, etc.

7. **Motor vehicle theft.**—Unlawful taking or stealing or attempted theft of a motor vehicle. A motor vehicle is a self-propelled vehicle that travels on the surface but not on rails. Specifically excluded from this category are motor boats, construction equipment, airplanes, and farming equipment.

The Part II offenses are:

8. **Other assaults (simple).**—Assaults which are not of an aggravated nature.

9. **Arson.**—Willful or malicious burning with or without intent to defraud. Includes attempts.

10. **Forgery and counterfeiting.**—Making, altering, uttering or possessing with intent to defraud, anything false which is made to appear true. Includes attempts.

11. **Fraud.**—Fraudulent conversion and obtaining money or property by false pretenses. Includes bad checks except forgeries and counterfeiting. Also includes larceny by bailee.

12. **Embezzlement.**—Misappropriation or misapplication of money or property entrusted to one's care, custody, or control.

13. **Stolen property; buying, receiving, possessing.**—Buying, receiving, and possessing stolen property and attempts.

14. **Vandalism.**—Willful or malicious destruction, injury, disfigurement, or defacement of property without consent of the owner or person having custody or control.

15. **Weapons; carrying, possessing, etc.**—All violations of regulations or statutes controlling the carrying, using, possessing, furnishing, and manufacturing of deadly weapons or silencers. Includes attempts.

16. **Prostitution and commercialized vice.**—Sex offenses of a commercialized nature and attempts, such as prostitution, keeping a bawdy house, procuring or transporting women for immoral purposes.

17. **Sex offenses (except forcible rape, prostitution, and commercialized vice).**—Statutory rape, offenses against chastity, common decency, morals, and the like. Includes attempts.

18. **Narcotic drug laws.**—Offenses relating to narcotic drugs, such as unlawful possession, sale, use, growing, manufacturing, and making of narcotic drugs.

19. **Gambling.**—Promoting, permitting, or engaging in gambling.

20. **Offenses against the family and children.**—Nonsupport, neglect, desertion, or abuse of family and children.

21. **Driving under the influence.**—Driving or operating any motor vehicle or common carrier while drunk or under the influence of liquor or narcotics.

22. **Liquor laws.**—State or local liquor law violations, except "drunkenness" (class 23) and "driving under the influence" (class 21). Excludes Federal violations.

23. **Drunkenness.**—Drunkenness or intoxication.

24. **Disorderly conduct.**—Breach of the peace.

25. **Vagrancy.**—Vagabondage, begging, loitering, etc.

26. **All other offenses.**—All violations of state or local laws, except classes 1–25 and traffic.

27. **Suspicion.**—Arrests for no specific offense and released without formal charges being placed.

28. **Curfew and loitering laws (juveniles).**—Offenses relating to violation of local curfew or loitering ordinances where such laws exist.

29. **Runaway (juveniles).**—Limited to juveniles taken into protective custody under provisions of local statutes as runaways.

594-359 O - 75 - 2

Law Enforcement Code of Ethics

As a Law Enforcement Officer, *my fundamental duty is to serve mankind; to safeguard lives and property; to protect the innocent against deception, the weak against oppression or intimidation, and the peaceful against violence or disorder; and to respect the Constitutional rights of all men to liberty, equality and justice.*

I will *keep my private life unsullied as an example to all; maintain courageous calm in the face of danger, scorn, or ridicule; develop self-restraint; and be constantly mindful of the welfare of others. Honest in thought and deed in both my personal and official life, I will be exemplary in obeying the laws of the land and the regulations of my department. Whatever I see or hear of a confidential nature or that is confided to me in my official capacity will be kept ever secret unless revelation is necessary in the performance of my duty.*

I will *never act officiously or permit personal feelings, prejudices, animosities or friendships to influence my decisions. With no compromise for crime and with relentless prosecution of criminals, I will enforce the law courteously and appropriately without fear or favor, malice or ill will, never employing unnecessary force or violence and never accepting gratuities.*

I recognize *the badge of my office as a symbol of public faith, and I accept it as a public trust to be held so long as I am true to the ethics of the police service. I will constantly strive to achieve these objectives and ideals, dedicating myself before God to my chosen profession . . . law enforcement.*

Crime and Offender

CRIME INDEX TOTALS

The offenses of murder, forcible rape, robbery, aggravated assault, burglary, larceny-theft, and motor vehicle theft are used to establish an Index in the Uniform Crime Reporting Program, to measure the trend and distribution of crime in the United States. These crimes are counted by law enforcement agencies as they become known and are reported on a monthly basis. The Crime Index offenses were selected as a measuring device because, as a group, they represent the most common local crime problem. They are all serious crimes, either by their very nature or due to the volume in which they occur. The offenses of murder, forcible rape, aggravated assault, and robbery make up the violent crime category. The offenses of burglary, larceny-theft, and motor vehicle theft make up the property crime category.

Law enforcement does not purport to know the total volume of crime, because of the many criminal actions which are not reported to official sources. Estimates as to the level of unreported crime can be developed through costly victim surveys, but this does not eliminate the reluctance of the victim to report all criminal actions to law enforcement agencies. In light of this situation, the best source for obtaining usable crime counts is the next logical universe, which is the offenses known to the police. The crimes used in the Crime Index are those considered to be most consistently reported and provide the capability to compute meaningful crime trends and crime rates.

The crime counts used in the Crime Index and set forth in this publication are based on actual offenses established by police investigation. When the law enforcement agency receives a complaint of a criminal matter and the follow-up investigation discloses no crime occurred it is "unfounded." On a national average, police investigations "unfound" 4 percent of the complaints concerning Crime Index offenses ranging from 2 percent in the larceny classification to 15 percent in the forcible rape classification. These unfounded complaints are eliminated from the crime counts.

During calendar year 1974, an estimated 10,192,000 Crime Index offenses were reported to law enforcement agencies. There is an 18 percent increase in estimated volume of Index offenses, 1974 over 1973. The violent crime category made up 10 percent of the Crime Index total and increased 11 percent in volume over 1973. Murder increased 6 percent, forcible rape 8 percent, and aggravated assault 8 percent. Robbery increased 15 percent. The voluminous property crimes as a group increased 18 percent. Larceny-theft increased 21 percent, burglary was up 18 percent, and motor vehicle theft was up 5 percent.

Since 1969, the violent crimes as a group have increased 47 percent and the property crimes 37 percent. Crime, as measured by the Crime Index offenses, has risen 38 percent in volume during this five-year period.

The estimated 1974 crime figures for the United States are set forth in the following table titled, "National Crime, Rate, and Percent Change."

A study of the volume of crime, as measured by the Crime Index, reveals the large core cities having population in excess of 250,000 recorded a 12 percent increase while the suburban and rural areas of the United States each registered a 20 percent increase. The cities over 1,000,000 population reported an increase of 10 percent from the previous year.

Regionally, in 1974, the Northeastern States reported a 16 percent increase in crime, the North Central States an 18 percent increase, the Southern States a 21 percent increase, and the Western States an increase of 14 percent.

Crime rates relate the incidence of reported crime to population. A crime rate should be considered a victim risk rate. Crime rates used are based on Crime Index offenses.

The Crime Index rate of the United States in 1974 was 4,821 per 100,000 inhabitants. This was a 17 percent increase from the crime rate of 4,130 per 100,000 inhabitants in 1973. The national crime rate, or the risk of being a victim of one of these crimes, has increased 32 percent since 1969. Many factors influence the nature and extent of crime in a particular community. A number of these factors are shown on page v of this publication. A crime rate takes into consideration

National Crime, Rate, and Percent Change

Crime index offenses	Estimated crime 1974		Percent change over 1973		Percent change over 1969		Percent change over 1960	
	Number	Rate per 100,000 inhabitants	Number	Rate	Number	Rate	Number	Rate

Aggravated assault	452,720	214.2	+8.5	+7.7	+46.6	+39.7	+195.6	+150.8
Burglary	3,020,700	1,429.0	+18.5	+17.6	+53.3	+46.1	+233.2	+182.6
Larceny—theft	5,227,700	2,473.0	+21.0	+20.2	+35.3	+28.9	+183.6	+140.6
Motor vehicle theft	973,800	460.6	+5.2	+4.4	+11.2	+5.9	+197.7	+152.5

only the numerical factor of population and does not incorporate any of the other elements which contribute to the amount of crime in a given area. Tables disclose that the varying crime experiences, especially in large cities and suburban communities, are affected by a complex set of involved factors and are not solely related to numerical population differences.

Crime Rate by Region, 1974

[Rate per 100,000 inhabitants]

Crime index offenses	Northeastern States	North Central States	Southern States	Western States
Total	4,377.5	4,661.6	4,353.7	6,501.1
Violent	495.7	409.5	447.0	507.2
Property	3,881.9	4,252.1	3,906.7	5,993.9

Burglary	1,305.2	1,267.2	1,380.9	1,929.9
Larceny-theft	1,975.5	2,560.3	2,190.6	3,507.7
Motor vehicle theft	601.2	424.5	335.2	556.2

Crime Rate by Area, 1974

[Rate per 100,000 inhabitants]

Crime index offenses	Area			
	Total U.S.	Metropolitan areas	Rural	Other cities
Total	4,821.4	5,621.6	1,746.5	4,027.2
Violent	458.8	558.4	151.2	249.2
Property	4,362.6	5,063.2	1,595.3	3,777.9
Murder	9.7	10.8	7.6	5.7
Forcible rape	26.1	31.2	11.6	13.4
Robbery	208.8	273.7	20.4	54.2
Aggravated assault	214.2	242.6	111.5	175.9
Burglary	1,429.0	1,652.6	693.2	1,024.9
Larceny-theft	2,473.0	2,830.9	808.3	2,543.5
Motor vehicle theft	460.6	579.6	93.8	209.6

The tables set forth on this page reveal the variations in crime experienced by metropolitan areas, rural areas, and other cities.

The crime rates set forth in the National Crime Rate and Percent Change table for each of the Crime Index offenses show a variation from a 20 percent increase in larceny-theft to a 4 percent increase in murder. The number of crimes per unit of population is highest in the large metropolitan centers.

The accompanying charts illustrate the trend of crime in the United States from 1969 through 1974 by showing percent changes in volume and crime rate together with the population increase. Separate charts provide similar information relative to crimes of violence and crimes against property. Since 1969, the violent crime rate has increased 40 percent and the property crime rate increased 31 percent. The violent crime group includes murder, forcible rape, robbery, and aggravated assault offenses. The property crime category is made up of burglary, larceny-theft, and motor vehicle theft offenses.

MURDER AND NONNEGLIGENT MANSLAUGHTER

This Crime Index offense is defined in Uniform Crime Reporting as the willful killing of another. The classification in this offense, as in all of the other Crime Index offenses, is based solely on police investigation as opposed to the determination of a court, medical examiner, coroner, jury, or other judicial body.

Deaths caused by negligence, suicide, accident, or justifiable homicide are not included in the count for this offense classification. Attempts to murder or assaults to murder are scored as aggravated assaults and not as murder.

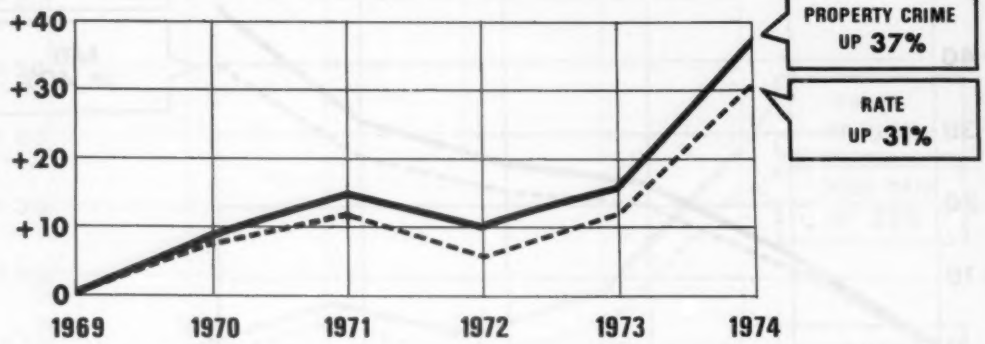

CHART 4

Volume

In 1974 there were an estimated 20,600 murders committed in the United States. This represents a numerical increase of 1,070 over the 19,530 estimated homicide offenses for 1973. The number of murders in 1974 is approximately 2 percent of the total for violent crime and less than one-half of one percent of the total of the seven Crime Index offenses.

An analysis of murder by month in 1974 shows that December had the greatest frequency of murder as compared to any other month of the year.

A geographical breakdown of murder by region showed 43 percent of the murders occurred in the Southern States, 24 percent in the North Central States, 18 percent in the Northeastern States, and 15 percent in the Western States.

Trend

The number of murders increased 6 percent in 1974 over 1973. The trend in this crime classification reveals an increase from 14,680 in 1969 to 20,600 in 1974. This is an increase of 40 percent.

Regionally, the number of murder offenses in 1974 increased 12 percent in the North Central States, 8 percent in the Western States, and 5 percent in the Southern States. The number of murders decreased approximately 3 percent in the Northeastern States.

An analysis, by population grouping, of murder shows that large core cities of 250,000 or more inhabitants had a 3 percent increase in the number of murders in 1974, the suburban areas experienced a 14 percent increase in murder offenses, and the rural areas had a 1 percent increase.

Murder Rate

In 1974, there were 9.7 victims of murder for every 100,000 inhabitants in the Nation. This was an increase of 4 percent over the murder rate of 9.3 per 100,000 inhabitants recorded in 1973.

By population grouping, the metropolitan areas reported a murder rate of 11 victims per 100,000 inhabitants, the rural areas a rate of 8 per 100,000 inhabitants, and cities outside metropolitan areas reported a murder rate of 6 per 100,000 inhabitants.

The number of murder victims in proportion to population was highest in the Southern States with 13.3 murders per 100,000 inhabitants. This is an increase of 3 percent over the murder rate of that Region in 1973. In 1974, the North Central States showed a murder rate of 8.5, an increase of 12 percent over the rate in 1973 for that Region. The Western States had a rate of 8.3, which was a 6 percent increase over the 1973 rate for those states. The Northeastern States had a rate of 7.4, a decrease of 3 percent in comparison to the 1973 rate.

Nature of Murder

The law enforcement agencies which participate in Uniform Crime Reporting cooperate in providing additional information regarding homicide so that a more indepth analysis of this offense can be made. Through a supplemental reporting system; information is provided regarding the age, sex, and race of the victim; the weapon used in the murder; and the circumstances surrounding the offense.

The victims of murder in 1974 were male in approximately three out of four instances. This ratio of male to female victims is similar to the experience in the last several years. Approximately 48 out of 100 murder victims were white, 50 were Negro, and 2 percent other races. The largest number of murders occurring in any ten year age bracket was in the 20 to 29 group with three of every ten murder victims.

In 1974, firearms again predominated as the weapon most often used in homicide in the nation. The accompanying chart illustrates a breakdown by type of weapon used in the commission of murder in the nation. Firearms were used more frequently in the Southern States than in any other region with firearms used in more than seven of every ten murders. Nationwide, 68 percent of the homicides were committed through the use of firearms and 54 percent were committed with handguns. In 1973, 53 percent of the murders were through the use of handguns.

Cutting or stabbing weapons were used in 18 percent of the murders in the nation. The Northeastern States reported the greatest use of knives or cutting instruments with three out of every ten murders being committed with this type of weapon. The North Central and Southern States had the least incidence of use of this type of weapon with less than two out of every ten murders. Other weapons (blunt objects, poisons, explosives, arson, drowning, etc.) were used in 7 percent of the homicides and the remaining 8 percent of the murders were the result of use of personal weapons such as hands, fists, feet, etc.

A comparative study for the past six years shows an increase from 65 percent of all homicides through use of firearms in 1969 to 68 percent of all homicides in 1974. A comparative analysis of weapons used to commit murder for 1969 through 1974 is shown in tabular form.

The circumstances which result in murder vary from family arguments to felonious activities. Criminal homicide is largely a societal problem which is beyond the control of police. The circumstances of murder serve to emphasize this point. In 1974, murder within the family made up approximately one-fourth of all murder offenses. Over one-half of these family killings involved spouse killing spouse. The remainder were parents killing children and other relative killings. Felony murder in Uniform Crime Reporting is defined as those killings resulting from robbery, burglary, sex motive, gangland and institutional slaying, and all other felonious activities. Felony type and suspected felony type murders in 1974 constituted 28 percent of all murders, whereas these two categories accounted for 27 percent of total murder in 1969. An analysis of felony murder reveals that 60 percent of these killings occurred in connection with robbery offenses. Prostitution and commercialized vice, rape, and sex offenses accounted for 8 percent of the total, while Narcotic Drug Law offenses comprise 7 percent of felony murder. Tables showing breakdown by geographical region for murder in 1974 and murder breakdown by circumstances for 1969–1974 accompany this section.

Murder Circumstances, 1969–1974

[Percent distribution]

Year	Total		Spouse killing spouse	Parent killing child	Other relative killings	Romantic triangle and lovers' quarrels	Other arguments	Known felony type	Suspected felony type
	Number	Percent							
1969	14,680	100.0	13.1	3.7	8.4	7.0	41.3	19.3	7.2

Murder Circumstances, 1974

[Percent distribution]

Region	Total	Spouse killing spouse	Parent killing child	Other relative killings	Romantic triangle and lovers' quarrels	Other arguments	Known felony type	Suspected felony type
Northeastern States	100.0	8.9	3.2	6.5	6.0	41.3	28.8	5.3
North Central States	100.0	11.0	1.8	7.2	5.8	41.7	25.9	6.6
Southern States	100.0	14.1	2.5	9.7	7.7	45.8	16.1	4.1
Western States	100.0	12.0	3.9	6.2	3.7	40.8	25.0	8.4
Total	100.0	12.1	2.7	8.0	6.2	43.2	22.2	5.6

During 1974, 6 percent of the murders were the result of romantic triangles or lovers' quarrels. In murders involving husband and wife, the wife was the victim in 52 percent of the incidents and the husband the victim in the remaining 48 percent. In these incidents involving spouses, 50 percent of the victims were Negro, 48 percent white, and the remaining victims were of other races.

The victims of felony type murder were 63 percent white, 36 percent Negro, and the remaining victims were of other races or race not reported.

Clearances

Nationally, police continue to be successful in clearing or solving by arrest a greater percentage of homicides than any other Crime Index offense. In 1974, 80 percent of the homicides were solved; and in 1973, 79 percent of all murder offenses were solved. Persons under 18 years of age were involved in 5 percent of the willful killings solved by police.

Since 1969, the clearance rate, nationwide, in homicide has decreased from 86 per 100 offenses to 80 per 100 offenses in 1974.

Persons Arrested

Based on reports submitted by law enforcement agencies, 10 percent of all persons arrested for murder were under 18 years of age and 45 percent were under 25. During the period 1969–1974, there was a 51 percent increase in the number of persons under 18 years of age arrested for murder. The increase in adult arrests for murder offenses during this period was 29 percent. Numerically, the 20 to 24 year age group had the heaviest involvement during 1974 with 25 percent of the total arrests coming from within this age group. Negroes made up 57 percent of the arrests for murder in 1974 and 50 percent of the victims of homicide were also Negroes.

Persons Charged

Law enforcement agencies' reports disclose that 54 percent of all adults arrested for murder in 1974 were prosecuted during the year. Forty-five percent of the adults prosecuted were found guilty as charged, and 21 percent were convicted on some lesser charge. The remaining won release by acquittal or dismissal of the charges against them. Of all individuals processed for murder, 9 percent were juveniles who had their cases referred to juvenile court jurisdiction.

AGGRAVATED ASSAULT

Aggravated assault is defined as an unlawful attack by one person upon another for the purpose of inflicting severe bodily injury usually accompanied by the use of a weapon or other means

likely to produce death or serious bodily harm. Attempts are included since it is not necessary that an injury result when a gun, knife, or other weapon is used which could and probably would result in serious personal injury if the crime were successfully completed.

Volume

In calendar year 1974, there were an estimated 452,720 aggravated assaults in the Nation. This is an 8 percent increase, or 35,300 additional offenses over 1973. This crime against the person made up 4 percent of the Crime Index offenses in 1974 and comprised 47 percent of the crimes of violence. Regionally, the Southern States reported 35 percent of the total count of these crimes followed by the North Central and Western States, each with 22 percent, and the Northeastern States with 21 percent. As has been the experience in previous years, the summer months recorded the highest frequencies of aggravated assault during 1974.

Trend

In 1974, the volume of aggravated assault offenses increased 8 percent over 1973 and 47 percent over 1969. Cities with over 250,000 inhabitants had an increase of about 5 percent. The suburban areas reported an increase of 12 percent and the rural areas an increase of 4 percent.

The Western States had an increase of 14 percent, the North Central States an increase of 11 percent, the Northeastern States had an 8 percent increase, and the Southern States an increase of approximately 4 percent.

Aggravated Assault Rate

For each 100,000 persons in the United States during 1974, there were 214 victims of aggravated assault. The metropolitan areas had an aggravated assault rate of 243 per 100,000 inhabitants. The rural areas had a victim rate of 112 per 100,000 inhabitants and the rate in cities outside metropolitan areas was 176 per 100,000 inhabitants. The victim rate for the Nation for aggravated assault increased 8 percent over 1973 and 40 percent over 1969.

The Western States were highest with a rate of 263 per 100,000 followed by the Southern States with 239, the Northeastern States with 189, and the North Central States 175.

Nature of Aggravated Assault

Most aggravated assaults occur within the family unit and among neighbors or acquaintances. The victim-offender relationship, as well as the nature of the attack, makes this crime similar to murder. In 1974, 25 percent of the serious assaults were committed with the use of a firearm. A knife or other cutting instrument was used in 24 percent of the assaults, 23 percent were committed with blunt objects or other dangerous weapons. The remaining assaults were with personal weapons such as hands, fists, and feet. A comparison of aggravated assault from 1969 to 1974 indicates that firearms as a weapon increased 57 percent; assaults with a knife or other cutting instrument rose 19 percent; assaults where blunt objects or other dangerous weapons were used increased 37 percent; and those aggravated assaults through use of personal weapons climbed 86 percent. The table which follows demonstrates the regional experience of aggravated assault in 1974 by type of weapon used.

Aggravated Assault, Type of Weapon Used, 1974

[Percent distribution]

Region	Total all weapons	Firearms	Knife or other cutting instrument	Other weapon; club, poison, etc.	Personal weapons
Northeastern States	100.0	18.9	30.7	26.2	24.2
North Central States	100.0	27.4	21.7	20.7	30.2
Southern States	100.0	30.0	23.9	20.9	25.2
Western States	100.0	23.7	20.3	25.7	30.3
Total	100.0	25.4	24.2	23.2	27.2

Clearances

Law enforcement agencies were successful in solving 63 of each 100 cases of aggravated assault in 1974. This relatively high solution rate is consistent with high solution rates in other crimes against the person. Persons under 18 years of age were identified in 11 percent of these clearances. Due to the nature of these crimes, arrests are frequently made upon the response of patrol units. This type of patrol call is hazardous to the officers. Since 1965, 149 officers have lost their lives responding to disturbance-type calls, which frequently involve family or neighborhood arguments.

Persons Arrested

Arrests for aggravated assault in 1974 increased 43 percent over 1969. Since 1969, arrests of persons 18 years of age and over for aggravated assault have increased 41 percent and arrests of persons under 18 years of age for this offense have in-

CHART 7

creased 52 percent. As a group, persons 21 years of age and over accounted for 69 percent of the arrests for aggravated assault in 1974 and those under age 21 accounted for 31 percent. Arrests of males outnumbered females by 6 to 1.

Persons Charged

Law enforcement agencies have difficulty in obtaining convictions based on the original charge in the aggravated assault category. The close family or other relationship which exists between victims and assailants in this category accounts for the victims' frequent unwillingness to testify for the prosecution. Acquittals and dismissals therefore continue to run high, accounting for 43 percent of the dispositions. Seventy-two out of every 100 adults arrested for aggravated assault in 1974 were prosecuted. Fourteen percent of the adults prosecuted for this offense were convicted of lesser charges. Seventeen percent of all persons processed were referred to juvenile court jurisdiction.

FORCIBLE RAPE

Forcible rape, as defined under this Program, is the carnal knowledge of a female through the use of force or the threat of force. Assaults to commit forcible rape are also included; however, statutory rape (without force) is not counted in this category. Crime counts in this offense classification are broken down by actual forcible rapes and attempted forcible rapes.

Volume

During 1974, there was an estimated total of 55,210 forcible rapes. Numerically, the volume increased by 3,980 offenses over 1973. Forcible rape continues, as in prior years, to comprise less than 1 percent of the Crime Index total. It makes up nearly 6 percent of the volume of crimes of violence. When viewed geographically, the Southern States recorded 32 percent of the total volume while the North Central States reported 25 percent. The Western and Northeastern States reported 24 and 19 percent, respectively.

A comparison of the month-to-month variations of forcible rape in 1974 with the long-term seasonally adjusted trend followed the pattern set for many years. Chart 17 reflects the month-to-month variations of forcible rape during 1974, as well as a comparison with the prior average 5-year experience.

Trend

The volume of forcible rape offenses in 1974 increased 8 percent over 1973, and 49 percent over 1969. During 1974, this crime occurred most frequently in large cities with 250,000 or more inhabitants, which accounted for 43 percent of the forcible rapes. Forcible rape increased 7 percent in this group of cities and 10 percent in the suburban areas surrounding the large core cities. The rural areas registered no change over 1973. Geographically, all regions of the United States reported increases in this offense. The Southern States reported an increase of 12 percent, followed by the North Central and Northeastern States with increases of 7 percent each. The Western States reported an increase of 4 percent.

Forcible Rape Rate

A crime rate, in its proper perspective, is a victim risk rate since it equates the number of crimes per unit of population. In 1974, 51 out of every 100,000 females in this country were reported rape victims. Since 1969, the forcible rape rate has increased 42 percent. In calendar year 1974, the forcible rape rate increased 7 percent over 1973.

The 58 core cities with populations in excess of 250,000 experienced a victim risk rate of 100 per 100,000 females. This is in marked contrast to the suburban areas of the country where the risk rate for females was 35 per 100,000 and the rural area with a risk rate of 23. In the Western States, a rate of 71 per 100,000 females was recorded. Females residing in the Southern States were victims of forcible rape at the rate of 51 per 100,000. The North Central and Northeastern States recorded rates of 47 and 40 per 100,000 females, respectively.

Nature of Offenses

In 1974, 74 percent of all forcible rape offenses were actual rapes by force. The remainder were attempts or assaults to commit forcible rape. This offense is a violent crime against the person, and of all the Crime Index offenses, law enforcement administrators recognize that this offense is probably one of the most under-reported crimes due primarily to fear and/or embarrassment on the part of the victims. As a national average, 15 percent of all forcible rapes reported to police were determined by investigation to be unfounded. In other words, the police established that no forcible rape offense or attempt occurred. Crime

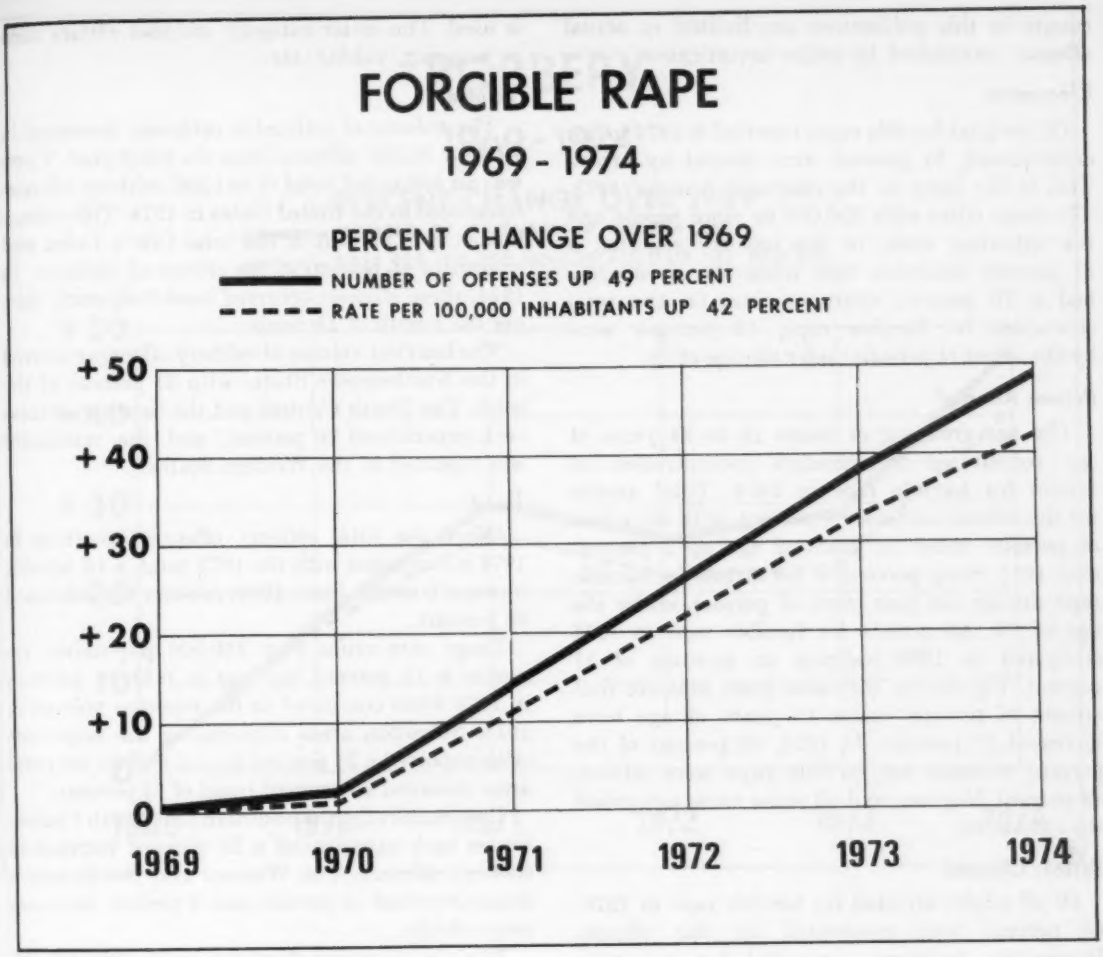

CHART 8

594-259 O - 75 - 3

counts in this publication are limited to actual offenses established by police investigation.

Clearances

Of the total forcible rapes reported in 1974 to law enforcement, 51 percent were cleared by arrest. This is the same as the clearance rate for 1973. The large cities with 250,000 or more people and the suburban areas of the country reported a 51 percent clearance rate while the rural areas had a 70 percent clearance rate. Of the total clearances for forcible rape, 10 percent were by the arrest of persons under the age of 18.

Persons Arrested

The age grouping of males 16 to 24 years of age constituted the greatest concentration of arrests for forcible rape in 1974. Total arrests for this offense increased 4 percent, with the arrest of persons under 18 years of age up 3 percent over 1973. Sixty percent of the arrests for forcible rape during the year were of persons under the age of 25. All arrests for forcible rape in 1974 compared to 1969 indicate an increase of 37 percent. Figures for the same years indicate that arrests of persons under 18 years of age have increased 32 percent. In 1974, 49 percent of the persons arrested for forcible rape were whites, 48 percent Negroes, and all other races comprised the remainder.

Persons Charged

Of all adults arrested for forcible rape in 1974, 60 percent were prosecuted for this offense. Prosecutive problems accounted for acquittals and/or dismissals in 49 percent of the cases. Thirty-five percent of the adults prosecuted were found guilty of the substantive offense and 16 percent were convicted of lesser offenses. Juvenile referrals amounted to 23 percent of the persons processed on forcible rape charges in 1974.

ROBBERY

Robbery is a vicious type of crime which takes place in the presence of the victim to obtain property or a thing of value from a person by use of force or threat of force. Assault to commit robbery and attempts are included. This is a violent crime and frequently results in injury to the victim. Beginning in 1974, information concerning robbery was collected to show the type of weapon used, as well as strong-arm robbery where no weapon other than a personal weapon is used. The latter category includes crimes such as mugging, yoking, etc.

Volume

The volume of estimated robberies increased in 1974 by 58,030 offenses from the prior year. There was an estimated total of 441,290 robbery offenses committed in the United States in 1974. This offense makes up 4 percent of the total Crime Index and comprises 46 percent of the crimes of violence. In 1974, these offenses occurred most frequently during the month of December.

The heaviest volume of robbery offenses occurred in the Northeastern States with 31 percent of the total. The North Central and the Southern States each experienced 26 percent, and the remainder was reported in the Western States.

Trend

When the total robbery offenses occurring in 1974 is compared with the 1973 total, a 15 percent increase is noted. Since 1969, robbery has increased 48 percent.

Large core cities over 250,000 population reported a 12 percent increase in robbery offenses in 1974 when compared to the reported volume in 1973. Suburban areas surrounding the large core cities reported a 23 percent increase while the rural areas recorded an upward trend of 22 percent.

Geographically, the Southern and North Central States each experienced a 21 percent increase in robbery offenses. The Western and Northeastern States reported 11 percent and 9 percent increases respectively.

The accompanying chart depicts the trend in the volume of robbery and the robbery rate, 1969–1974.

Robbery Rate

The 1974 robbery rate of 209 per 100,000 inhabitants was 14 percent above the 1973 rate. Robbery is primarily a large city crime. Two-thirds of all robberies in the United States during 1974 occurred in cities with more than 100,000 inhabitants. These cities had a robbery rate of 648 victims per 100,000 people.

There were 274 robbery victims per 100,000 inhabitants in the metropolitan areas during 1974. The rural areas experienced a rate of 20 victims per 100,000 people. The robbery rate in the cities outside metropolitan areas was 54 per 100,000 inhabitants.

This crime occurred most frequently in relation to population in the Northeastern States where

the rate was 278 per 100,000 inhabitants. The North Central States had a rate of 202, the Western States 199, and the Southern States 169 per 100,000 people.

Nature of Robbery

Supplemental robbery information is obtained from law enforcement agencies as a part of the monthly collection of statistical data under this Program. In 1974, these figures disclosed that half of the robberies were committed in the street. Nationally, bank robbery offenses increased from 2,521 offenses in 1973 to 3,517 in 1974. The average bank robbery dollar loss decreased from $4,653 in 1973 to $3,598 in 1974.

The 1969–1974 trends in robbery by type, as illustrated by the following charts, show bank robbery has increased 94 percent. During this same period, gas or service station holdups have decreased 20 percent; chain store robberies increased 184 percent; street robberies 29 percent; robberies in residences 63 percent; and holdups of other commercial or business establishments rose 42 percent.

As it has been pointed out in prior issues of this publication, the full impact of this violent crime on the victim cannot be completely measured in terms of dollar loss alone. While the object of the attack is money or property, many victims of the mugger and the strong-arm robber, as well as the armed robber, suffer serious personal injury. During 1974, the average value loss in each robbery incident was $321 for a total loss of $142 million.

Robbery, Type of Weapon Used, 1974

[Percent distribution]

Region	Total	Armed			Strong-armed
		Firearms	Knife or other cutting instrument	Other weapon	
Northeastern States	100.0	34.0	20.5	11.0	34.5
North Central States	100.0	51.4	7.4	7.6	33.6
Southern States	100.0	55.5	8.0	5.0	31.5
Western States	100.0	42.5	12.9	7.4	37.2
Total	100.0	44.7	13.1	8.1	34.1

Clearances

In 1974, law enforcement agencies were successful in clearing 27 percent of the robbery offenses reported. Eighty-two percent of the robberies which were cleared by arrest involved adults. Of the strong-arm robberies cleared, 30 percent were by the arrest of persons under 18 years of age. In robberies where a knife was used, persons under the age of 18 were involved in 18 percent of the clearances, 11 percent in those in which a firearm was used, and 10 percent in which another dangerous weapon was used.

Persons Arrested

Nationally, arrests for robbery increased 14 percent in 1974 when compared to 1973. The greatest volume of arrests occurred in cities and were up 13 percent. In the rural areas, arrests increased 22 percent and in the suburban areas arrests increased 21 percent.

Examination of arrest data discloses that 77 percent of the persons arrested for robbery were under 25 years of age and 56 percent were under 21 years of age. Of all persons arrested for robbery, 33 percent were under the age of 18. This greater proportion of youthful arrests, compared to clearances, is accounted for in part by the fact the young-age offenders frequently act in groups. Robbery arrests for this young-age group recorded a 10 percent increase in 1974 over 1973.

In 1974, 7 of every 100 persons arrested for robbery were females. Arrests of women for this offense rose 14 percent in 1974 when compared to 1973.

From a standpoint of race, 62 percent of those arrested were Negro, 35 percent were white, and all other races made up the remainder.

Persons Charged

In 1974, 61 percent of all adults arrested for robbery were prosecuted. Thirty-four percent of the persons processed for this crime were juveniles whose cases were referred to juvenile court jurisdiction. Of the adults prosecuted in 1974, 45 percent were convicted of the substantive offense, 17 percent were convicted for lesser charges, and the remainder were acquitted or their cases were dismissed.

BURGLARY

The Uniform Crime Reporting Program defines burglary as the unlawful entry of a structure to commit a felony or theft. The use of force to gain entry is not required to classify the crime as a burglary. The offense of burglary in this Program is broken down into three subclassifications: forcible entry, unlawful entry where no force is used, and attempted forcible entry.

CHART 10

Volume

An estimated total of 3,020,700 burglaries occurred during 1974. The increase in the number of offenses from 1973 to 1974 was 470,800. In 1973, the large core cities over 250,000 inhabitants recorded 33 percent of the total burglary figure. For calendar year 1974, this decreased to 32 percent. Of the Crime Index offenses, burglary makes up 30 percent of the total. When viewed as a segment of property crime, burglary is found to comprise 33 percent of the total. Geographically, the Southern States reported 31 percent of the total volume, the Western and the North Central States 24 percent each, and the Northeastern States 21 percent.

Viewed monthly the highest volume of burglary occurred in December of 1974.

Trend

The five-year trend, 1969–1974, indicates burglary offenses have risen 53 percent. In 1974, burglary increased 18 percent from 1973. Cities over 250,000 population reported an increase of 13 percent. In 1973, these cities experienced an increase of 4 percent in volume. In 1974, the suburban and rural areas of the nation reported increases of 20 and 23 percent, respectively. Viewed regionally, the Southern States reported a 25 percent increase and the North Central States a 21 percent increase in burglary offenses. The Northeastern States experienced a 15 percent increase and the Western States an 11 percent increase for this offense.

Burglary Rate

The burglary rate in 1974 was 1,429 per 100,000 inhabitants. During the period of 1969–1974, this rate increased 46 percent. The burglary rate for 1974 increased 18 percent when compared with 1973. The metropolitan areas reported a rate of 1,653 burglaries per 100,000 people. The rural areas recorded a rate of 693 offenses per 100,000 inhabitants, and the cities outside metropolitan areas had a rate of 1,025 burglaries per 100,000.

The Western States recorded the highest burglary rate in 1974 with 1,930 offenses per 100,000 inhabitants followed by the Southern States with a rate of 1,381, the Northeastern States 1,305, and the North Central States 1,267.

Nature of Burglary

Burglary is generally accepted as a crime of stealth and opportunity. It is committed by both amateurs and professionals. In 1974, 75 percent of the burglaries involved forcible entry, 19 percent were unlawful entry (without force) and the remainder were forcible entry attempts.

Nonresidential offenses accounted for 38 percent of total burglaries in 1974; residential burglaries accounted for 62 percent. Daytime burglaries of residences increased 19 percent in 1974 and accounted for over half of the residential burglaries. Considering the period 1969–1974, there has been an increase of 67 percent in the volume of daytime residential burglaries.

Prevention and detection of the burglary offense poses a most difficult problem to law enforcement. Volume alone is an overriding factor, particularly as related to the number of officers available for this type investigation. Viewed as a group, nighttime burglary represents 61 percent of all burglaries.

Economically, the offense of burglary represents a substantial sum. Victims suffered a loss of $1.2 billion in 1974 through the offense of burglary; this is an increase of about $322 million from the 1973 loss. During 1974, residential losses amounted to $758 million. In 1973, that loss amounted to $545 million. Nonresidential losses due to burglaries amounted to $423 million in 1974 and $314 million in 1973. In 1974, the average dollar loss per burglary was $391.

Clearances

As suggested earlier, burglary is a crime of stealth. This characteristic tends to make the detection of the perpetrator more difficult. In 1974, law enforcement was successful in clearing 18 percent of the total burglary offenses.

Adults were involved in 66 percent of all cases cleared while young persons under 18 years of age were involved in 34 percent. Law enforcement agencies in cities 250,000 and above cleared 18 percent of these crimes in 1974. In the suburban areas 17 percent were solved while 20 percent were cleared in the rural areas.

Persons Arrested

In this Program, the arrest of one person may account for the clearance of numerous offenses. Likewise, the arrest of several may clear only one offense. In the offense of burglary, it has been the experience of law enforcement that the arrest of one person frequently clears several reported offenses. In 1974, total arrests for burglary increased by 21 percent. Arrests of persons under

the age of 18 increased 20 percent while arrests of persons 18 years and over increased 22 percent. In the cities and suburban areas, increases of 21 and 22 percent respectively were reported. The rural areas experienced a 21 percent increase in total arrests for burglary.

In analyzing the 1969–1974 period, a 45 percent increase in burglary arrests is seen. Arrests of individuals under the age of 18 increased 44 percent, while the arrests of adult burglary offenders increased 46 percent.

Nationally, persons under 25 accounted for 85 percent of all arrests for burglary in 1974. Persons under 18 accounted for 53 percent of all arrests for this crime. Females were involved in five of every 100 arrests for burglary during 1974. Arrests of whites accounted for 67 percent of all burglary arrests in 1974. Thirty-one percent of the persons arrested for burglary were Negroes.

Persons Charged

In 1974, 70 percent of the adults arrested for burglary were prosecuted. Of the adults prosecuted, 53 percent were found guilty as charged. Conviction for lesser offenses accounted for 16 percent and 31 percent were freed through acquittal or dismissal of charges. Juveniles referred to juvenile court jurisdiction accounted for 57 percent of all persons processed for burglary in 1974.

LARCENY–THEFT

Larceny-theft is the unlawful taking or stealing of property or articles without the use of force, violence, or fraud. It includes crimes such as shoplifting, pocket-picking, purse-snatching, thefts from motor vehicles, thefts of motor vehicle parts and accessories, bicycle thefts, etc. In the Uniform Crime Reporting Program this crime category does not include embezzlement, "con" games, forgery, and worthless checks. Motor vehicle theft, of course, is excluded from this category for crime reporting purposes inasmuch as it is a separate Crime Index offense.

Volume

In 1974, there were 5,227,700 offenses of larceny-theft, which is an increase from 4,319,100 such crimes in 1973. This offense makes up 51 percent of the Crime Index total. From a seasonal standpoint, the volume of larceny was highest during the summer months of 1974.

Geographically, the volume of larceny-theft was highest in the North Central and Southern States, which each reported 28 percent of the total number followed by the Western States with 25 percent, and the Northeastern States with 19 percent.

Trend

Larceny-theft increased 21 percent in 1974 when compared to the previous year. The large cities with over 250,000 inhabitants reported an increase of 18 percent in volume. The suburban and rural areas both reported a 22 percent increase. Nationwide, this offense has increased 35 percent since 1969.

Geographically, the Northeastern and Southern States each reported increases of 24 percent, while the North Central States had an increase of 20 percent and the Western States recorded an increase of 18 percent.

Larceny Rate

During 1974, the larceny crime rate was 2,473 offenses per 100,000 inhabitants, an increase of 20 percent from the 1973 rate. The rate has increased 29 percent since 1969. In 1974, the larceny rate in the metropolitan areas was 2,831 per 100,000 inhabitants, 808 in the rural areas, and 2,543 per 100,000 inhabitants in cities outside any metropolitan areas. Viewed geographically, the Western States reported the highest larceny rate with 3,508 offenses per 100,000 inhabitants, which was a 16 percent increase over 1973. The North Central States had a rate of 2,560 up 20 percent; the Southern States 2,191 up 22 percent; and the Northeastern States with 1,976 reported an increase of 24 percent in the rate.

Nature of Larceny-theft

The average value of property stolen in each larceny in 1974 was $156, up from $111 in 1969 and $74 in 1960. When the average value is applied to the estimated crimes in this category, the dollar loss to victims is $816 million. It is true that a portion of the goods stolen was recovered and returned to victims, but the relatively low percentage of these crimes cleared by arrest and the lack of specific identification characteristics on such property indicate these recoveries did not materially reduce the overall loss. In addition, many offenses in this category, particularly where the value of the stolen goods is small, never come to police attention.

In 1974, the average value of goods and property reported stolen from victims of pickpockets was $117, by purse-snatchers $75, by shoplifters $32,

by thefts from motor vehicles $180, and by miscellaneous thefts from buildings $271.

From year to year, the distribution of larceny as to type of theft remains relatively constant. As in prior years, a major portion of these thefts, 33 percent, represented thefts of motor vehicle parts and accessories and other thefts from motor vehicles. Other major types of thefts which contributed to the large number of these crimes were thefts from buildings and stolen bicycles, with 17 percent each. Miscellaneous types of larcenies, not falling into any of the specific categories for which data were collected, made up 17 percent of the total. The remainder was distributed among pocket-picking, purse-snatching, shoplifting, and thefts from coin-operated machines. The accompanying table presents the distribution of larceny by type within the geographic regions of the United States.

Larceny Analysis by Region, 1974

[Percent distribution]

	Northeastern States	North Central States	Southern States	Western States
Pocket-picking	2.6	.5	.8	.5
Purse-snatching	3.5	2.1	1.8	1.2
Shoplifting	8.5	10.3	11.4	13.3
From motor vehicles (except accessories)	16.9	15.5	17.4	20.7
Motor vehicle accessories	17.0	17.1	15.9	13.5

From buildings	18.5	19.5	16.1	15.3
From coin-operated machines	.9	1.0	2.0	1.6
All others	14.5	16.6	19.0	17.1
Total	100.0	100.0	100.0	100.0

Clearances

The nature of larceny, a crime of opportunity, sneak thievery, and petty unobserved thefts, makes it an extremely difficult offense for law enforcement officers to solve. A lack of witnesses and the tremendous volume of these crimes work in the offender's favor. In 1974, 20 percent of all larceny offenses brought to police attention were solved. Involvement of the young age group is demonstrated by the fact that 37 percent of these crimes which were cleared in the Nation's cities were solved by arrest of persons under 18 years of age. Juvenile clearance figures for suburban areas and rural areas were 40 percent and 25 percent, respectively.

Persons Arrested

One-half of the total arrests for Crime Index offenses in 1974 were for larceny. Arrests for this crime increased 25 percent, 1974 over 1973. Forty-nine percent of these arrests were of persons under 18 years of age, and when individuals under 21 were considered, the ratio rose to two-thirds. When examined by sex of arrested person, it was determined that females comprised 31 percent of all arrests for larceny-theft and had a higher involvement in this offense than for any of the other Index offenses. In fact, women were arrested more often for larceny than any other offense in 1974.

Arrests of females rose 23 percent in 1974; while arrests of males increased 26 percent. Arrests of whites outnumbered Negroes by more than 2 to 1 with all other races comprising about 2 percent of the arrests for larceny-theft. The total volume of arrests for larceny-theft in 1974 as compared with the 1969 figures indicates a 49 percent increase. Arrests of individuals under 18 were 35 percent greater than 1969. The number of adult arrests rose 66 percent over the number of arrests for this offense in 1969.

Persons Charged

As in prior years, law enforcement agencies nationally charged more offenders for larceny-theft than for any other Crime Index offense. Seventy percent of the adults prosecuted for larceny-theft were found guilty of this offense, 6 percent were found guilty of a lesser charge, and the remaining had their cases dismissed or were acquitted. Thirty-eight percent of persons processed in 1974 for larceny were referred to juvenile court jurisdiction.

MOTOR VEHICLE THEFT

In Uniform Crime Reporting, motor vehicle theft is defined as the unlawful taking or stealing of a motor vehicle, including attempts. This definition excludes taking for temporary use by those persons having lawful access to the vehicle.

Volume

In 1974, 973,800 motor vehicles were reported stolen. This is a 5 percent increase compared to 1973 when 925,700 motor vehicles were reported stolen.

Geographically, the volume of motor vehicle theft in 1974 was highest in the Northeastern States which reported 31 percent of the total number followed by the North Central States with 25 percent. The Southern States reported 23 percent and the Western States reported the

remainder. This crime made up 10 percent of the total Crime Index offense volume. Seasonal variations during 1974 disclosed that the volume of motor vehicle theft was highest during the month of October.

Trend

The number of motor vehicle thefts in 1974 increased 5 percent compared to 1973. The number of motor vehicle thefts has increased 11 percent since 1969.

Motor vehicle theft decreased 2 percent in large cities with 250,000 or more inhabitants during 1974. The rural areas reported an increase of 12 percent in motor vehicle thefts while the suburban areas had an increase of 10 percent.

Geographically, motor vehicle thefts were up 8 percent in the Southern States, the North Central States reported an increase of 6 percent, the Western States an increase of 5 percent, and the Northeastern States reported an increase of 3 percent. The accompanying chart shows the trend in motor vehicle thefts; 1969–1974.

Motor Vehicle Theft Rate

The 1974 motor vehicle theft rate of 461 offenses per 100,000 inhabitants is 4 percent higher than in 1973. Since 1969, the motor vehicle theft rate has risen 6 percent. People in cities with over one million population were deprived more often of their motor vehicles in 1974 than in any other population group with 11 thefts per 1,000 inhabitants.

Nationally, the motor vehicle theft rate in the metropolitan areas was 580 per 100,000 inhabitants. The rural areas had a motor vehicle theft rate of 94, and cities outside metropolitan areas had a rate of 210.

Regionally, the Northeastern States had the highest motor vehicle theft rate in 1974. This rate was 601, an increase of 3 percent from 1973. The Western States had a rate of 556 per 100,000 inhabitants which was an increase of 3 percent. The North Central States had a rate of 425 which was 7 percent higher than the prior year and the Southern States reported an increase of 6 percent in the motor vehicle theft rate to 335 per 100,000 inhabitants.

Across the Nation in 1974, one of every 129 registered automobiles was stolen. Regionally, this rate was the highest in the Northeastern States where 12 cars per 1,000 registered vehicles were stolen. In the other three regions the figures were 8 in the Western States, 7 in the North Central States, and 5 in the Southern States.

Nature of Motor Vehicle Theft

Motor vehicle theft rates again clearly indicate that this crime is primarily a large city problem since the highest rates appear in the most heavily populated sections of the Nation. In 1974, the average value of stolen motor vehicles was $1,246 at the time of theft.

Clearances

Law enforcement agencies were successful in solving 15 percent of the motor vehicle thefts by arrest of the offender.

In the Nation's largest cities, 12 percent of motor vehicle thefts were cleared during 1974. Throughout the Nation, motor vehicle theft clearance percentages ranged from 24 percent in the South Atlantic States to 7 percent in the New England States.

In all geographic divisions and population groups, the participation of the young-age group population is indicated by the high proportion of these clearances which were through the arrest of persons under 18 years of age. In the large core cities, 31 percent of the motor vehicle thefts cleared were cleared by arrests in this age group while juveniles accounted for 37 percent of the solutions in the suburbs and 30 percent in the rural areas.

Persons Arrested

As in prior years, persons arrested for motor vehicle theft come primarily from the young–age group population. In 1974, 55 percent of all persons arrested for this crime were under 18 years of age. When persons under 21 are included in the computations, the proportion of arrests rises to 74 percent.

The national trend in motor vehicle theft arrests disclosed a decrease of 3 percent in 1974 when compared to 1973. Adult arrests decreased 1 percent while arrests of persons under 18 decreased 4 percent. During the period 1969–1974 motor vehicle theft arrests decreased 11 percent.

Females under 18 years of age recorded a decrease of 4 percent in arrests for motor vehicle theft from 1973. White persons made up 67 percent of the arrests for motor vehicle theft, Negroes 30 percent, and all other races accounted for the remainder.

CHART 15

Persons Charged

Police reports disclosed that of all persons formally processed for motor vehicle theft in 1974, 64 percent were referred to juvenile court jurisdiction. No other Crime Index offense results in such a high percentage of juvenile referrals. When the remaining adult offenders were considered as a group, 48 percent of those prosecuted on charges of motor vehicle theft were found guilty as charged, 13 percent were convicted of lesser charges, and 39 percent were acquitted or their cases were dismissed.

MOTOR VEHICLE THEFT SURVEY

During the months of September and October 1974, a two-month nationwide survey was conducted concerning the thefts of motor vehicles and the arrests of persons for motor vehicle thefts. More than 5,900 law enforcement agencies representing 69 percent of the United States' population participated in this survey. There were 137,975 motor vehicle thefts reported in this survey which represented about 85 percent of all vehicles reported stolen during a two-month period of 1974.

There were 2,265 law enforcement agencies that reported the arrest of 18,492 persons for motor vehicle theft during this two-month survey. Of the persons arrested, 15,465 were in possession of a stolen motor vehicle at the time of arrest. In 54 percent of these possession arrests, the offender was under 18 years of age. Thirty-one percent were 18 to 24 years of age and the remaining 15 percent were 25 years of age and over. Police were assisted through the use of law enforcement computer systems in one-third of the arrests for possession of stolen vehicles. The computer was used in 39 percent of the vehicle theft arrests of persons 18 years of age and older and 29 percent of the persons under 18 years of age.

Motor vehicle theft data was collected within three model year groups and by four vehicle types. The survey disclosed that nearly 85 percent of the reported stolen vehicles during the survey period were passenger type vehicles while 6 percent were truck and bus type vehicles. Motorcycles accounted for 8 percent and the remaining 1 percent were other type vehicles. Almost one-half of all vehicles reported stolen during the survey period were 1968 and prior year passenger cars. A significant finding in this survey is in the analysis of passenger car thefts compared to passenger cars in operation. The 1969 and newer model cars make up 58 percent of cars in use while 45 percent of the cars stolen were of these model years. United States automobile manufacturers, since 1969, have been equipping their passenger cars with a steering column ignition lock designed to prevent or deter vehicle movement. The steering column ignition and key-in warning system appear to have made an impact on the passenger car theft problem according to the results of this survey.

A comparison of property crime trends during the past five years is another indicator of the impact automobile anti-theft devices have had on the crime problem. This five-year comparison shows a smaller increase in vehicle thefts when compared to larceny-theft and burglary trends.

[1] Represents only those reported motor vehicle thefts occurring within participating agencies.
[2] Report of R. L. Polk Company's National Vehicle Registration Service on passenger cars in the U.S., 7-1-74.

The 1972–1975 model passenger cars reported stolen during the survey totaled 29,552 cars of which 40 percent were produced by Ford, 37 percent were General Motors makes, 8 percent were Chrysler products, and the remaining 15 percent were foreign and other domestic makes. Law enforcement agencies within 44 metropolitan areas of the United States examined 10,014 recovered stolen 1972–1975 passenger cars during the survey period. These examinations disclosed 57 percent of the recovered late-model cars had intact ignition systems. This would tend to indicate use of a key to operate the stolen cars. Victims of motor vehicle thefts admitted leaving the key in their vehicle in about 14 percent of the theft incidents during September and October, 1974. The remaining 43 percent of examined, recovered stolen 1972–1975 model cars revealed ignition systems had been forced or compromised in order to steal these cars. Valuable information was gathered which will allow automobile manufacturers to evaluate the effectiveness of present auto anti-theft devices.

Motor vehicle theft is an urban crime problem. Eighty percent of the vehicles reported stolen in this survey were taken in cities of over 50,000 population and in suburban counties. More than one-half of all vehicles stolen were from within cities of over 250,000 in population. The survey showed the incidence of theft was highest in residential areas where over one-half of the motor vehicles were stolen. Thirty-three percent were taken from streets and parking lots of business or commercial areas. Two-thirds of the thefts in residential areas were between 6 p.m. and 6 a.m., while slightly over one-half of the vehicles stolen from business or commercial areas were between 6 p.m. and 6 a.m.

When comparing the total number of vehicles recovered to the total number of vehicles stolen during the survey, the recovery percentage was 69.3 percent. Seventy-five percent of the vehicles stolen in cities under 10,000 population were recovered and 80 percent of vehicles stolen in rural counties were recovered. The study revealed 62.4 percent of the stolen vehicles recovered were located within 48 hours of the time of theft. Three out of four instances of the vehicle recovery occurred within the same jurisdiction where the vehicle had been stolen.

Criminal history information was collected during the survey on 15,809 persons arrested for motor vehicle theft by 1,988 law enforcement agencies. Of these persons, 42 percent had no prior arrest history, 36 percent had a prior arrest history for offenses other than motor vehicle theft, and 22 percent had a prior motor vehicle theft arrest. Motor vehicle theft continues to be a first offense experience for juveniles embarking on what could become serious criminal careers. Forty-eight percent of the young offenders arrested during the survey had no arrest history prior to arrest for motor vehicle theft.

This survey, as was true in a November 1962 nationwide vehicle theft survey, disclosed the public has a definite responsibility in reducing the opportunity for theft by removing the key from the car and locking the ignition. A positive attitude change in the motoring public in this connection could affect the incidence of vehicle thefts. A composite finding in this survey will reveal most vehicles stolen are 1968 or prior year passenger cars which are unlocked with an

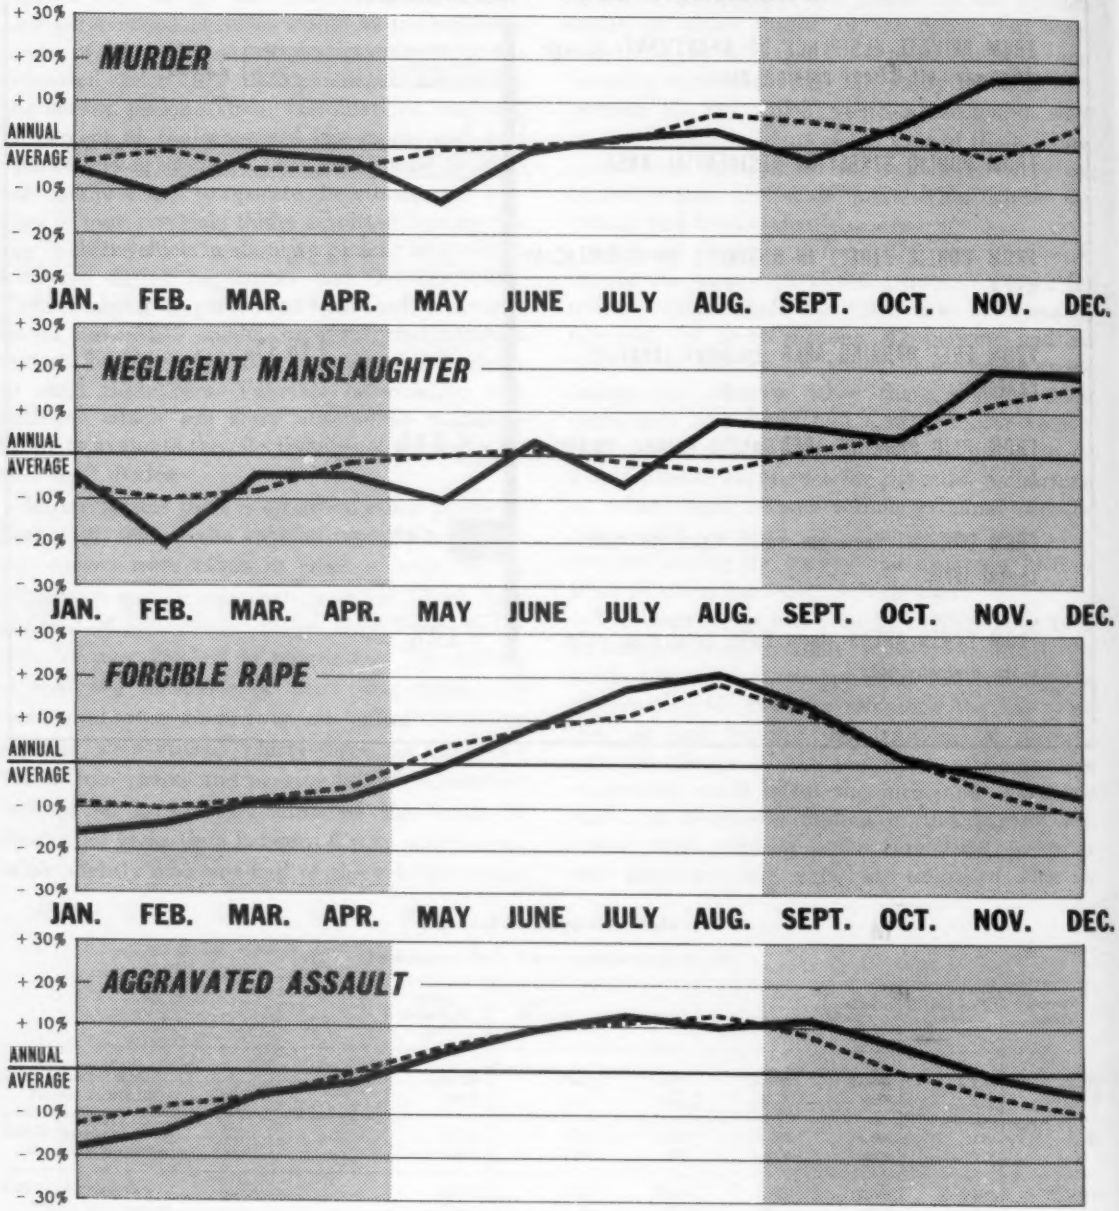

CHART 17

open switch ignition or with the key having been left in the car. The typical theft occurs from a residential area within a large city or surrounding suburb during the night. These cars are recovered in the same city within 48 hours of the theft. The offender is most likely to be under 18 years of age and have no arrest record.

CLEARANCES

Law enforcement agencies clear a crime when they have identified the offender, have sufficient evidence to charge him and actually take him into custody. Crime solutions are also recorded in exceptional instances when some element beyond police control precludes the placing of formal charges against the offender, such as the victim's refusal to prosecute after the offender is identified or local prosecution is declined because the subject is being prosecuted elsewhere for a crime committed in another jurisdiction. The arrest of one person can clear several crimes or several persons may be arrested in the process of clearing one crime.

The nationwide clearance information as reported by law enforcement agencies shows that 21 percent of the Index crimes were cleared during 1974. In 1974 law enforcement agencies cleared 80 percent of the murder offenses, 51 percent of forcible rapes, 63 percent of aggravated assaults, and 27 percent of the robberies. Solutions in the property crime categories showed police cleared 18 percent of the burglaries in 1974, 20 percent of the larcenies, and 15 percent of the motor vehicle thefts. Police are able to clear a higher percentage of the crimes against the person, not only because of the more intense investigative effort afforded these violent crimes requiring police attention, but more importantly, because witnesses are usually available who can identify the perpetrators.

The highest overall Crime Index clearance rate regionally was recorded by the Southern States with 24 percent, followed by the North Central States with 22 percent, the Western States with 21 percent, and the Northeastern States with 18 percent.

The accompanying chart reveals crime and police clearance experience for the last five years. From 1969 to 1974 the Crime Index offenses rose 38 percent. Police response to this upward trend was a 42 percent increase in the number of Crime Index offenses cleared and a 40 percent increase in the number of arrests for Crime Index offenses. The clearance rate for Crime Index type offenses for 1969 was 21 of every 100, which is approximately the same rate reported in 1973 and 1974.

Offenses Cleared by Arrest of Juveniles

One means of measuring the involvement of the young-age group in crime is to identify the number of crimes in which they are the offenders. In 1974, 31 percent of all Crime Index offenses solved involved only persons under 18 years of age, while persons 10 to 17 years of age account for about 16 percent of the total United States population.

PERSONS ARRESTED

In 1974, law enforcement agencies made an estimated 9.1 million arrests nationally for all criminal acts except traffic offenses. The arrest rate was 46 arrests for each 1,000 persons. In 1973, there were 42 arrests for each 1,000 inhabitants. The arrest rate for big cities as a group was 57 per 1,000 inhabitants, for suburban areas 38, and in the rural areas the arrest rate was 28.

Arrests are primarily a measure of police activity. Arrest practices, policies, and enforcement emphasis will vary from place to place and within a community from time to time. The volume of police arrests for certain unlawful conduct such as drunkenness, disorderly conduct, and certain local ordinances is particularly influenced by the above. On the other hand, robbery, burglary, and other arrests for serious crimes are more likely the result of standard procedures. Arrests are first a measure of police activity as it relates to crime. Arrests do, however, provide a useful index to indicate involvement in criminal acts by the age, sex, and race of the perpetrators, particularly for those crimes which have a high solution rate. Procedures used in this Program require that an arrest be counted on each separate occasion when a person is taken into custody, notified, or cited. Arrests do not measure the number of individuals taken into custody since one person may be arrested several times during the year for the same or different offenses. As noted above, this happens frequently for certain types of offenses against public order such as drunkenness, vagrancy, disorderly conduct, and related violations.

Arrest Trends

In 1974, police arrests for all offenses except traffic increased 3 percent over 1973. During this time, arrests of persons under 18 years of age increased 9 percent and arrests of persons 18 years of age and over increased 1 percent. When only Crime Index offenses are used to compute this trend, there is an 18 percent increase for all ages.

During the five-year period, 1969–1974, police arrests for all offenses except traffic increased 9 percent, with the arrests of persons under 18 years of age up 16 percent and the arrests of persons 18 years of age and over up 7 percent. When only the Crime Index offenses are used in computing this five-year trend, the increase is 40 percent. Arrests of persons under 18 years of age increased 32 percent while the adult arrests increased 49 percent. Violent crime arrests for persons under 18 years of age increased 49 percent while the property crime arrests increased 30 percent.

Arrests for Narcotic Drug Law violations, 1974 over 1973, were up 2 percent nationally. From 1969 to 1974, arrests for this violation increased 80 percent. There is set forth a tabulation by geographic region showing the type of narcotic drug involved in the arrest of the offender during 1974.

Narcotic Drug Laws

[Percent distribution]

Region	Total	Heroin or cocaine	Marijuana	Synthetic narcotics	Other
Northeastern States	100.0	18.5	71.1	4.5	5.9
North Central States	100.0	17.2	69.8	3.8	9.2
Southern States	100.0	10.8	74.0	3.7	11.5
Western States	100.0	10.3	65.2	6.0	18.5
Total	100.0	15.8	69.4	4.3	10.5

Age

Nationally, persons under 15 years of age made up 10 percent of the total police arrests; under 18, 27 percent; under 21, 43 percent; and under 25, 58 percent. In the suburban areas, the involvement of the young age groups in police arrests is markedly higher than the national figures, with the under 15 age group represented in 12 percent; under 18, 33 percent; under 21, 50 percent; and under 25, 64 percent. In the rural areas the distributions were lower for the younger age groups, with the under 15 group being involved in 5 percent; under 18 in 19 percent; under 21 in 37 percent; and those under 25 in 53 percent of total police arrests. When only the Index crimes are considered, 19 percent of all persons arrested in 1974 were under the age of 15 and 45 percent were under 18 years of age.

Sex

Male arrests outnumbered female arrests by 5 to 1 in 1974. Male arrests in 1974 rose by 2 percent while female arrests were up 9 percent. Nineteen percent of the arrests for Crime Index offenses were of female persons. Ten percent of the arrests for violent crimes in 1974 involved females and arrests of females for these types of crimes increased 13 percent over 1973. Again, as in prior years, their involvement was primarily for larceny which accounted for 23 percent of all female arrests. Females accounted for 26 percent of the embezzlement and 14 percent of the narcotics arrests. Over one-half of the runaway—police custody cases—were females under 18 years of age.

The five-year arrest trends, 1969–1974, revealed that arrests for young females under 18 years of age increased 21 percent while arrests for young males under 18 rose 15 percent. When the serious crimes as a group are considered, arrests of males, 1969–1974, were up 35 percent and female arrests increased 68 percent.

Arrest Rates

The following table sets forth arrest rates by geographic regions for Crime Index offenses. Arrest rates indicate law enforcement activity in response to crime.

Arrests by Region, 1974

[Rate per 100,000 inhabitants]

Offense	U.S. Total	Northeastern States	North Central States	Southern States	Western States
Murder	10.3	6.5	10.2	14.3	11.1
Forcible rape	13.3	12.3	11.1	15.2	15.8
Robbery	80.9	87.2	69.0	75.5	96.9
Aggravated assault	115.2	108.6	74.7	134.1	164.7
Burglary	254.1	207.9	213.5	289.5	361.5
Larceny-theft	544.2	398.0	586.0	542.5	680.9
Motor vehicle theft	80.0	67.3	62.3	66.7	139.9
Crime Index total	1,098.0	887.8	1,026.7	1,117.9	1,470.7

PERSONS CHARGED

Disposition data reveals the results of cases in which law enforcement agencies have made an arrest and subsequently formally charged the offender in a court of jurisdiction. This information is important to the law enforcement administrator in evaluating the quality of investigations and court presentation functions.

In 1974, 81 percent of the adults arrested for Crime Index offenses were prosecuted in the courts. Of the adults prosecuted for Crime Index offenses, 61 percent were found guilty as charged and 9 percent of a lesser charge.

It must be recognized that not all arrested persons are turned over to the courts for prosecution. There are various reasons for this: failure of the victim to cooperate or appear for the prosecution, persons arrested are released with a warning, evidence is obtained which discloses the arrested person did not commit the offense, or there is not sufficient evidence available to support either a formal charge or a subsequent prosecution.

For example, about one-half of the juveniles arrested are handled by the individual law enforcement agencies without preferring a formal charge or referring them directly to juvenile authorities. All contributors to this Program are urged to obtain and report final disposition in cases involving persons they arrest. Tables containing this data commence on page 174. Keep in mind that police methods of handling juvenile offenders differ widely from place to place. Also, the tables concerning juveniles (local age limit) refer to those who were arrested and turned over to juvenile authorities in connection with specific criminal acts.

Forty-one percent of the persons processed for Crime Index offenses were young persons referred to juvenile court jurisdiction. Similar to prior years, juvenile referrals for motor vehicle theft were significant. Sixty-four percent of those processed for motor vehicle theft were juveniles. Juvenile referrals for burglary were 57 percent, larceny 38 percent, robbery 34 percent, forcible rape 23 percent, aggravated assault 17 percent, and murder 9 percent.

During 1974, as in past years, motor vehicle theft, arson, burglary, and vandalism recorded high percentages of juvenile referrals. When all crime categories are reviewed, it is noted that convictions on original charges remained high in the offenses against public order and decency—driving under the influence, drunkenness, disorderly conduct, and vagrancy. As in prior years, offenses against trust, such as fraud and embezzlement, also recorded a high percentage of conviction on original charges.

Of the adults who were prosecuted for Crime Index offenses, 29 percent were acquitted or their cases were dismissed. In 1974, 34 percent of the murder defendants were either acquitted or their cases dismissed at some prosecutive stage. Forty-nine percent of those charged with forcible rape were acquitted or had their cases dismissed, and 43 percent of the persons charged with aggravated assault were released either through acquittal or dismissal.

Seventy percent of those persons prosecuted for the offense of larceny were found guilty of that offense in 1974. This was followed by burglary with 53 percent found guilty of the original charge, 48 percent for motor vehicle theft, 45 percent for robbery, 45 percent for murder, 43 percent for aggravated assault, and 35 percent for forcible rape.

The offense which had the highest percentage guilty of a lesser charge was murder where 21 percent of the defendants were convicted on some charge other than murder.

CAREERS IN CRIME

From January, 1963, through December, 1969, the Uniform Crime Reporting Program processed criminal history data on some 240,000 offenders for statistical use. This study was used to document the extent to which criminal recidivism based on arrest information over a period of time contributes to annual crime counts. The study has also been used to show the need for the centralization of law enforcement information at the state and national level in view of criminal repeating and mobility. This offender based study was made possible by the cooperative exchange of criminal fingerprint data among local, state, and Federal law enforcement agencies. While the basis of selection in this study was a Federal offense, it should be kept in mind that most Federal criminal violations are also violations of local and state laws. The offender transaction records examined

in this study are, therefore, believed to be similar to the local and state experience for the more serious violators.

The Careers in Crime study brought to the Uniform Crime Reporting Program valuable statistical experience in the field of criminal histories, and has demonstrated the use of offender based transaction information to indicate the success or failure of the entire criminal justice system. The key to the effectiveness of the system is in knowing what happened to the people who were handled or treated by the criminal justice process, specifically, whether they were deterred from further criminal acts and/or rehabilitated.

In January, 1970, the FBI began converting offender records to computer form for the operational Computerized Criminal History File of the National Crime Information Center. Although this is an operational program, it was designed and established with full recognition of the statistical and research potential of offender based data.

A summary of 207,748 offenders in the Computerized Criminal History file who were arrested during the period 1970–1974 is set out in the following tables. Of these 207,748 individuals, 135,470 (65 percent) had been arrested two or more times. These individuals had an average criminal career of five years and five months (number of years between first and last arrest) during which time they were arrested an average of four times each. The 207,748 offenders had a total of 835,000 documented charges during their criminal careers, with 277,014 reported convictions and 109,657 imprisonments of six months or more.

Of the 135,470 repeat offenders, 68,430 or 51 percent were rearrested in states other than that where first arrested. Of the 68,430 "mobile" offenders, 14,212 were arrested in a total of three different states and 10,503 were arrested in four or more different states.

It should be kept in mind that this presentation is conservative and understates the amount of crime committed by these offenders since it is based on police detection, arrest, and submission of a fingerprint card. As indicated in earlier pages of this publication, law enforcement agencies do not clear or solve most crimes. Only one-fifth of the serious crimes committed during 1974 were solved by arrest. It is also true that the prior conviction and imprisonment rates are slightly lower than actual because criminal justice agencies do not always submit such data after arrest, conviction, and release. In fact, disposition data has not been received on over 372,000 of the 835,000 charges.

A profile of criminal repeating for selected offenders is shown in the following table. Average age for the first arrest is high because of the general practice not to submit criminal fingerprint cards on juveniles. Criminal career is the average years between the first and last arrest.

The offender profile is classified by type of crime for which last arrested during the 1970's.

When criminal repeating is viewed by type of crime for which arrested in the 1970's, repeaters ranged from 28 percent for the embezzler to 79 percent for the robbers and auto thieves.

Follow-up

A follow-up study was made of the 62,236 offenders in the CCH File who were released during calendar year 1972. These offenders were followed through 1974 for any subsequent arrest in which a fingerprint card was submitted. Charts and tables are shown in this section on the rearrest experienced by offense; type of release; and age, sex, and race of the offender.

When criminal repeating is checked by type of crime from which released in 1972, rearrest ranged from 22 percent for the embezzler to 76 percent for the burglars. Largest repeater rates in the same crime were for the narcotic offenders with 28 percent being rearrested for the same crime and gambling law violators with 20 percent being rearrested on a gambling violation within three years. Of the 3,203 offenders being released in 1972, from a weapons violations, 11 percent were rearrested for a violent crime within three years. Forty-eight of these offenders were rearrested for murder. Two hundred eighty-one were rearrested for a weapons violation and 267 were rearrested for a narcotics violation. Of all persons rearrested during the follow-up study, 24 percent were rearrested on a charge more serious than one from which released in 1972.

Sixty-seven percent of the offenders released after serving their prison time were rearrested within three years. Of those persons released on parole, 64 percent repeated and 48 percent of those placed on probation repeated. Of those persons acquitted or who had their cases dismissed in 1972, 59 percent were rearrested for new offenses within three years.

Profile of Offenders Arrested, 1970–1974

[By last charge in 1970–1974]

	Total	Murder	Aggravated assault	Rape	Robbery	Burglary	Larceny	Motor vehicle theft

CRIME INDEX TABULATIONS

In this section, tabulations are shown to indicate the probable extent, fluctuation, and distribution of crime for the United States as a whole; geographic divisions; individual states; standard metropolitan statistical areas; and cities, towns, and counties. The measure used is a Crime Index consisting of seven important offenses which are counted as they become known to the law enforcement agencies. Crime classifications used in the Index are: murder and nonnegligent manslaughter, forcible rape, robbery, aggravated assault, burglary-breaking or entering, larceny-theft, and motor vehicle theft.

The total number of criminal acts that occur is unknown, but those that are reported to law enforcement provide the first means of a count. Not all crimes come readily to the attention of law enforcement; not all crimes are of sufficient importance to be significant in an index; and not all important crimes occur with enough regularity to be meaningful in an index. With these considerations in mind, the above crimes were selected as a group to furnish an abbreviated and convenient measure of the crime problem.

It is important to remember in reviewing the tables in this section that the volume of crime in any area is subject to the factors set forth on page V. Estimates of current permanent population are used to construct crime rates. With our highly mobile population all communities, metropolitan areas, and states are affected to a greater or lesser degree by the element of transient population. This factor is not accounted for in crime rates since no reliable estimates by state are available nationwide.

Crime trend and rate tables group places according to population size. Law enforcement's performance in clearing crimes by arrest is presented by population group and geographic division.

National city averages are also shown indicating the type and value of the property stolen, by offense and type, and value recovered by police investigation. Robbery, burglary, and larceny-theft are examined by type, as well as where and when they occurred. Dispositions made of persons formally charged for all criminal offenses are also set forth.

Statistical data relating to suburban areas are provided for the use of law enforcement officials in suburban communities in making limited comparisons. Places used to establish totals for suburban areas include cities with 50,000 or less population together with county law enforcement agencies in standard metropolitan statistical areas. Of course, the crime experience of the large core city is excluded.

It is important to remember in studying averages that usually about half the units used must be above and about half below. National averages can provide the law enforcement administrator with valuable guidance in analyzing the local crime count, as well as the performance of his force in combating crime. The analysis, however, does not end with such a comparison, for it is only through an appraisal of local conditions that a clear picture of the community crime problem or the effectiveness of the law enforcement operation is possible.

[1] Population is Bureau of the Census provisional estimate as of July 1, 1974.

[2] Violent crime is offenses of murder, forcible rape, robbery, and aggravated assault; property crime is offenses of burglary, larceny-theft and motor vehicle theft.

[3] The percentage representing area actually reporting will not coincide with the ratio between reported and estimated crime totals since these data represent the sum of the calculations for individual states which have varying populations, portions reporting and crime rates.

[1] Population for each state for 1973 and 1974 is Bureau of Census provisional estimate as of July 1st and subject to change.

[2] Violent crime is offenses of murder, forcible rape, robbery, and aggravated assault. Property crime is offenses of burglary, larceny-theft, and motor vehicle theft.

[3] Offense totals based on all reporting agencies and estimates for unreported areas.

[4] Includes the District of Columbia.

[1] Violent crime is offenses of murder, forcible rape, robbery, and aggravated assault.

[2] Property crime is offenses of burglary, larceny-theft, and motor vehicle theft.

[3] Additional reporting occurred in 1974 due to State Uniform Crime Programs being activated or due to revised figures being submitted for agencies previously reported. Accordingly, figures are not comparable to data published in prior issues. See table 3 for adjusted figures.

[1] 1974 figures not comparable with prior years, and are not used in trend tabulations. Trends in this report are based on the volume of crimes reported by comparable units. Agency reports which are determined to be influenced by a change in reporting practices for all or specific offenses, or annexation, are removed from trend tables.

Table—7. *Number of Offenses Known to Police, 1974, Universities*

[1] Violent crime is offenses of murder, forcible rape, robbery, and aggravated assault.
[2] Property crime is offenses of burglary, larceny-theft, and motor vehicle theft.
[3] Includes suburban city and county police agencies within metropolitan areas. Excludes core cities. Suburban cities are also included in other city groups.
[4] Includes state police agencies with no county breakdown.

SUBURBAN AREA [3]											
3,440 agencies; population 61,541,000:											
Number of offenses known	2,618,710	170,617	2,448,093	3,437	2,452	11,965	54,672	100,543	769,959	1,470,994	207,140
Rate	4,255.2	277.2	3,978.0	5.6	4.0	19.4	88.8	163.4	1,251.1	2,390.3	336.6
RURAL AREA [4]											
1,483 agencies; population 21,233,000:											
Number of offenses known	427,085	34,316	392,769	1,662	1,990	2,771	4,828	25,055	168,078	202,936	21,755
Rate	2,011.4	161.6	1,849.8	7.8	9.4	13.1	22.7	118.0	791.6	955.8	102.5

[1] Violent crime is offenses of murder, forcible rape, robbery, and aggravated assault.

[2] Property crime is offenses of burglary, larceny-theft, and motor vehicle theft.

[3] Includes suburban city and county police agencies within metropolitan areas. Excludes core cities. Suburban cities are also included in other city groups.

[4] Includes state police agencies with no county breakdown.

Population figures rounded to the nearest thousand. All rates were calculated on the population before rounding.

Table 15.—*Crime Rates, Offenses Known to the Police, 1974, for Suburban and Nonsuburban Cities by Population Groups*

[1974 estimated population. Rate: Number of crimes per 100,000 inhabitants]

Population group	Crime Index total	Violent crime [1]	Property crime [2]	Criminal homicide		Forcible rape	Robbery	Aggravated assault	Burglary—breaking or entering	Larceny-theft	Motor vehicle theft
				Murder and nonnegligent manslaughter	Manslaughter by negligence						
Suburban Cities

Jewelry and precious metals	241,200,000	17,600,000	7
Furs	16,600,000	1,400,000	8
Clothing	64,000,000	9,200,000	14
Locally stolen motor vehicles	954,000,000	628,600,000	66
Miscellaneous	1,095,300,000	141,600,000	13

[1] All totals and percentages calculated before rounding.

Arrest Tabulations

Tables in the following section provide certain personal characteristics of individuals arrested for all criminal acts. Arrest rates and trends are shown for city, suburban, and rural areas, as well as the United States as a whole. Tabulations are published containing characteristics of persons arrested by age, sex, and race.

Arrest statistics were collected monthly from contributing law enforcement agencies this year. In using these arrest figures, it is important to remember that the same person may be arrested several times during one year for the same type or for different offenses. Each arrest is counted. Further, the arrest of one person may solve several crimes and in other instances two or more persons may be arrested during the solution of one crime.

Arrests are primarily a measure of law enforcement activity as it relates to crime. Although arrest practices vary, particularly with respect to juveniles, contributors to this Program are instructed to count one arrest each time an individual is taken into custody for commiting a specific crime. A juvenile is counted as a person arrested when he commits an offense and the circumstances are such that if the offender were an adult, an arrest would be made.

Arrest data, while primarily a measure of law enforcement activity, is also a gauge of criminality when used within its limitations as must be done with all forms of criminal statistics including ccurt and penal.

Table 28.—*Total Estimated Arrests,*[1] *United States, 1974*

Total [2]	**9,955,800**	Weapons; carrying, possessing, etc.	170,300
		Prostitution and commercialized vice	68,400
Criminal homicide:		Sex offenses (except forcible rape and prostitution)	64,600
Murder and nonnegligent manslaughter	20,200	Narcotic drug laws	642,100
Manslaughter by negligence	3,770		
Forcible rape	25,380	Opium or cocaine and their derivatives	101,500
Robbery	148,720	Marijuana	445,600
Aggravated assault	234,060	Synthetic or manufactured narcotics	27,600
Burglary—breaking or entering	516,100	Other—dangerous narcotic drugs	67,400
Larceny—theft	1,056,300	Gambling	61,900
Motor vehicle theft	158,600		
		Bookmaking	5,100
Violent crime [2]	429,350	Numbers and lottery	8,200
Property crime [2]	1,731,000	All other gambling	48,600
		Offenses against family and children	61,000
Subtotal for above offenses [2]	2,164,100	Driving under the influence	843,600
		Liquor laws	310,000
Other assaults	391,100	Drunkenness	1,332,600
Arson	16,900	Disorderly conduct	767,600
Forgery and counterfeiting	60,600	Vagrancy	44,700
Fraud	148,600	All other offenses (except traffic)	1,169,700
Embezzlement	13,000	Suspicion (not included in total)	45,900
Stolen property; buying, receiving, possessing	113,200	Curfew and loitering law violations	151,000
Vandalism	221,100	Runaways	239,600

[1] Arrest totals based on all reporting agencies and estimates for unreported areas.
[2] Because of rounding, items may not add to totals.

Table 29.—*Arrests, Number and Rate, 1974, by Population Groups*

Offense charged	Cities								Other areas	
	Total (5,298 agencies; total population 134,082,000)	Total city arrests (4,237 cities; population 103,652,000)	Group I (43 cities over 250,000; population 34,669,000)	Group II (81 cities 100,000 to 250,000; population 11,461,000)	Group III (211 cities 50,000 to 100,000; population 14,668,000)	Group IV (425 cities 25,000 to 50,000; population 14,951,000)	Group V (1,056 cities 10,000 to 25,000; population 16,719,000)	Group VI (2,421 cities under 10,000; population 11,183,000)	Suburban area,[1] (2,636 agencies; population 47,034,000)	Rural area (806 agencies population 12,829,000)

[1] In suburban agencies male arrests under 18 increased 11.7 percent and female arrests under 18 increased 5.3 percent. In rural agencies male arrests under 18 increased 6.7 percent and female arrests under 18 decreased 4.7 percent.

[2] Violent crime is offenses of murder, forcible rape, robbery and aggravated assault.

[3] Property crime is offenses of burglary, larceny—theft and motor vehicle theft.

Section 3
Law Enforcement Employee Data

This publication has a section with tables of Law Enforcement Employee Data which shows average police employee strength by geographic division and population group. This data is subdivided by sex of employees, percentage of civilian employees, number and type of patrol assignments, and an individualized listing of police employees by reporting cities and surrounding suburban counties. Tables containing data relative to law enforcement officers assaulted in the line of duty are published to supplement the following narrative material.

Employee Rates

The average number of law enforcement employees per 1,000 inhabitants (including civilian employees) was 2.5. Male employees represented 88.9 percent of total police employee strength.

Many cities in the United States continue to operate with a police employee ratio of less than the national average of 2.5 per 1,000. Fifty percent of all law enforcement agencies in cities had police ratios ranging from 1.4 to 2.5 police employees per 1,000 inhabitants.

Nationally, large cities with 250,000 or more inhabitants as a group had an average ratio of 3.5 employees per 1,000 inhabitants.

The average ratio of police employees to population in the suburban areas was 2.1 per 1,000 inhabitants; an increase from the 1.9 rate in 1973. One-half of the suburban police departments had from 1.3 to 2.4 employees per 1,000 inhabitants. The average rate of full–time employees in sheriffs' departments was 1.6 per 1,000 inhabitants; however, in three–fourths of the departments the rate was 1.3 or less.

Police departments in the Middle Atlantic and South Atlantic States continued to have the highest average rate with 3.0 employees per 1,000 inhabitants. Cities in the West South Central and West North Central States had the lowest average ratio with 2.0.

POLICE EMPLOYEE DATA

AVERAGE NUMBER OF POLICE DEPARTMENT EMPLOYEES, AND RANGE IN NUMBER OF EMPLOYEES, PER 1,000 INHABITANTS

BY POPULATION GROUPS, OCTOBER 31, 1974

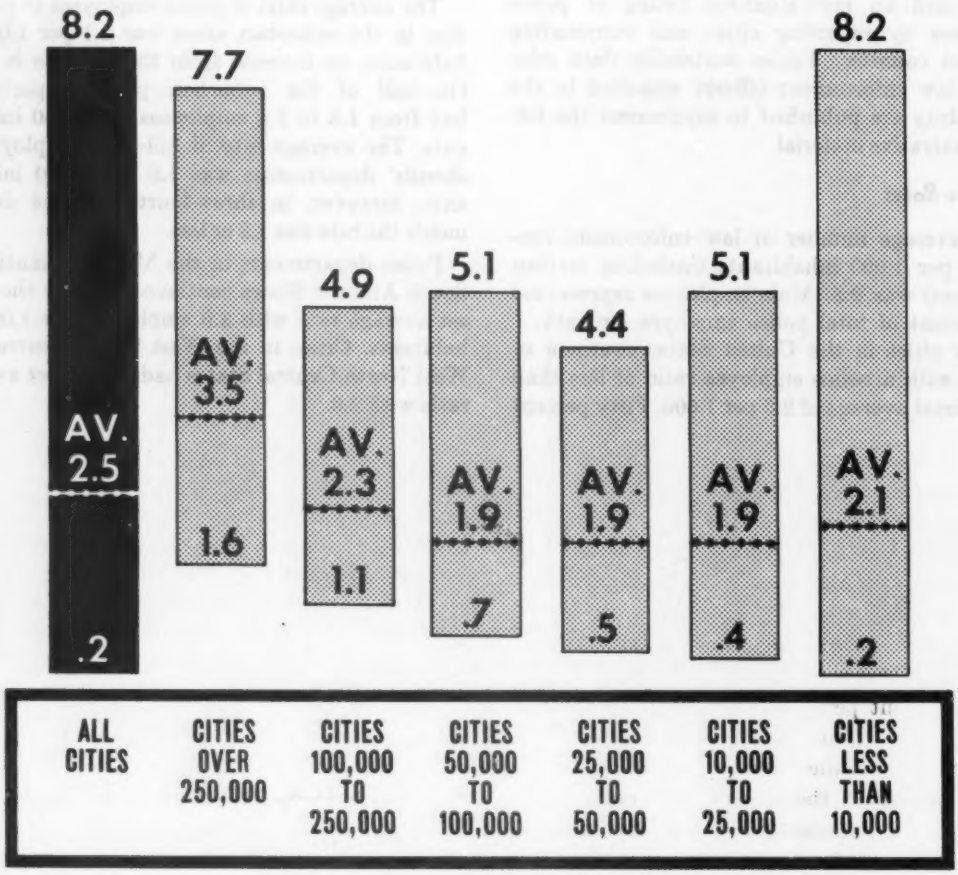

CHART 23

Civilian Employees

In Table 64, the percentage of total law enforcement personnel represented by civilian employees is tabulated by population group. On the average during 1974, 15.3 percent of all city police personnel were civilian employees; up from 14.6 percent in 1973. Of all civilian employees, 61 percent were female and 39 percent were male personnel. Law enforcement administrators are continuing to utilize greater numbers of civilian employees thereby relieving sworn personnel for active police duties.

Sworn Personnel

Law enforcement employee rates based on sworn personnel only (excluding civilian employees) show that the average for all cities was 2.1 per 1,000 inhabitants in 1974. The city rates, nationally, range from 0.1 to 9.6 per 1,000 inhabitants. In city agencies, males represented 98 percent of all sworn personnel, while males in suburban agencies constituted 97 percent and in county sheriff and police departments 94 percent. The average ratio of sworn employees in sheriff's departments was 1.3 per 1,000 inhabitants and the rate range for the 2,503 reporting county agencies was 0.1–11.2 per 1,000 inhabitants. Caution should be exercised, however, in using rates for comparative purposes since there is a wide variation in the responsibilities of various law enforcement agencies throughout the country. Just as the conditions which affect the amount and type of crime that occurs vary from place to place, so do the requirements for types of police service based upon the conditions which exist in a given community. For example, the increased need for police service in a community which has a highly mobile or seasonal population, differs from a community which has a relatively stable or fixed population. In addition, a small community situated between two large cities may require a greater number of law enforcement personnel to handle crime conditions based solely on its geographic location.

The functions of the sheriffs also vary widely in different sections of the country. In certain areas the sheriffs' responsibilities are limited almost exclusively to civil functions and/or the administration of the county jail facilities. The sheriffs' departments used in computing rates, however, are all engaged in law enforcement activity and are responsible for all phases of policing in their jurisdiction.

It is pointed out that the figures set forth in detailed police employee tables (Tables 56 and 57) represent national averages. They should be used as a guide or indicator and not considered as recommended or desirable police strengths. Adequate manpower for a specific place can only be determined after a careful study and analysis of the various factors which contribute to the requirement for police service in that community.

Police Patrols

In 1974, 88 percent of the police patrol assignments utilized in cities were vehicle patrols, and 12 percent were foot patrols. In cities with over 250,000 inhabitants 82 percent were vehicle patrols and 18 percent were foot patrols. In the areas covered by sheriffs and county police departments, 95 percent were vehicle patrols and 5 percent were foot patrols. For all cities, patrol distribution indicated that 35 percent of the patrol activity was during the day, 35 percent during the evening hours, and after midnight 30 percent. Large cities over 250,000 inhabitants showed that approximately 40 percent of the patrol activity was during the day, 33 percent during the evening hours, and 27 percent after midnight. In the areas covered by sheriffs and county police, 41 percent of the patrol activity was during the day, 31 percent during the evening hours, and 28 percent after midnight.

The distribution of one- and two-man vehicle patrol assignments for all cities indicated that 85 percent of the vehicle patrols during the day involved one-man cars, 81 percent during the evening hours, and after midnight 76 percent. In the large cities with 250,000 or more inhabitants, 64 percent of the daytime patrols involved the use of one-man cars, 66 percent during the evening hours, and after midnight 52 percent. In the areas covered by sheriffs and county police departments, 94 percent of the daytime patrols involved the use of one-man cars, 85 percent during the evening hours, and after midnight 81 percent were one-man vehicles.

LAW ENFORCEMENT OFFICERS KILLED

In 1974, a total of 132 local, county, state, and Federal law enforcement officers were killed due to felonious criminal action in the United States and Puerto Rico. During the ten-year period 1965–1974, 947 officers were killed. The number of law enforcement officers from Puerto Rico for the period 1971–1974 and the number of Federal

officers for the period 1972–1974 have been included in the tabulations with the local, county, and state officers for the ten-year period. Specifically, there were 53 officers killed in 1965; 57 in 1966; 76 in 1967; 64 in 1968; 86 in 1969; 100 in 1970; 129 in 1971; 116 in 1972; 134 in 1973; and 132 in 1974.

Circumstances Surrounding Deaths

There were more law enforcement officers killed attempting arrests than in any other police activity in 1974. This trend was established in prior years and continues as one of the most dangerous situations the police officer faces today. Twenty-eight officers were killed while attempting arrests for crimes other than robbery or burglary. In connection with robbery offenses, 25 officers were slain by persons encountered during the commission of a robbery or during the pursuit of robbery suspects. Eight officers were killed at the scene of burglaries or while pursuing burglary suspects. No arrest situation can be considered routine and officers must utilize extreme caution with all individuals they contact.

In 1974, nine officers were killed in ambush situations. During the period 1970–1974, 62 officers have been slain in ambush situations. One-half of these officers were entrapped and slain through premeditated action. The other 31 officers were killed in unprovoked attacks which did not involve any apparent element of entrapment.

Twenty-nine officers were slain in 1974 responding to "disturbance calls" which include family quarrels, man with gun, bar fights, etc. Twelve officers were killed while investigating suspicious persons or circumstances. Eleven officers were slain while making traffic stops, and ten officers were killed while transporting or otherwise engaged in custody of prisoners.

Fifty-four of the officers killed in 1974 utilized their service firearms while in contact with their assailants. Thirty-four of these officers discharged their service firearms while attempting to protect themselves. Fifty-five percent (or 71) of the officers killed by firearms were within five feet of their assailants. Ninety-nine of the 128 officers slain by firearms were within ten feet of their assailants.

In 1974, 57 officers were slain in the Southern States, 37 in the North Central States, 20 in the Western States, and 14 in the Northeastern States. The following chart shows the number of law enforcement officers killed by region for each of the two five-year periods, 1965–1969 and 1970–1974. An accompanying table shows the officers feloniously killed in 1974 by geographic division and population grouping.

Number of Law Enforcement Officers Feloniously Killed in 1974

[By geographic division and population groups]

Geographic division	Total	Group I over 250,000	Group II 100,000 to 250,000	Group III 50,000 to 100,000	Group IV 25,000 to 50,000	Group V 10,000 to 25,000	Group VI under 10,000	County, State Police and Highway Patrol	Federal Agencies
Total	132	46	10	7	5	8	15	39	2
New England	1	1							
Middle Atlantic	13	7	1	3				2

LAW ENFORCEMENT OFFICERS KILLED

BY REGIONS OF THE UNITED STATES
(excludes Puerto Rico)

1965-1974

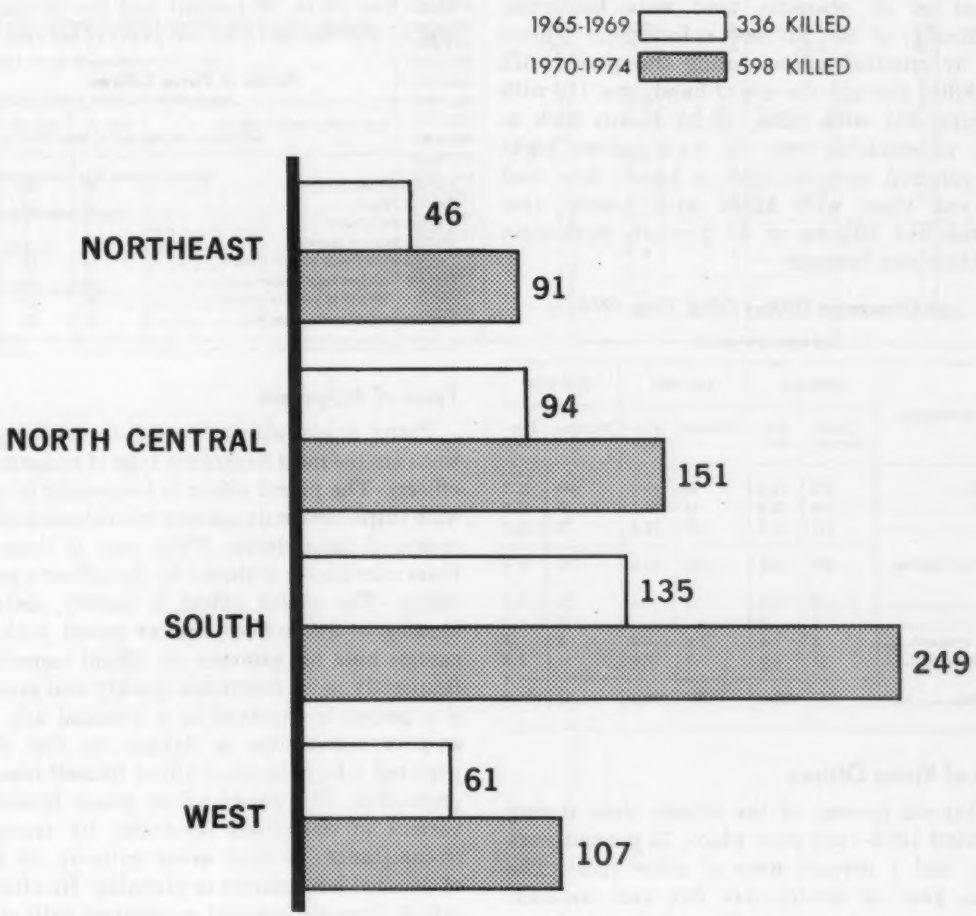

CHART 24

Weapons Used

One hundred twenty-eight, or 97 percent, of the law enforcement officers killed in 1974 were slain with firearms. Handguns were used in 95 of these deaths, shotguns in 21, and rifles were used to kill twelve of the officers. Eleven officers were slain with their own firearms. Three officers were killed through the use of automobiles and one officer met death as a result of an assault with a knife.

During the period 1965–1974, 96 percent of the officers were killed with firearms. Seventy-one percent of all weapons used were handguns. Specifically, of the 947 law enforcement officers slain by criminal action during this period, 675 were killed through the use of handguns, 119 with shotguns, 111 with rifles, 18 by means such as clubs, automobiles, etc., 13 with knives, eight with personal weapons such as hands, fists, and feet, and three were killed with bombs. One hundred five officers, or 11 percent, were slain with their own firearms.

Law Enforcement Officers Killed, 1965–1974

[By type of weapon]

Type of weapons	1965–1974		1965–1969		1970–1974	
	Total Number	Percent	Number	Percent	Number	Percent

Shotgun	119	12.6	44	13.1	75	12.3
Rifle	111	11.7	38	11.3	73	11.9
Total firearms	905	95.6	322	95.8	583	95.4
Knife	13	1.4	2	.6	11	1.8
Bomb	3	.3			3	.5
Personal weapons	8	.8	5	1.5	3	.5
Other (clubs, etc.)	18	1.9	7	2.1	11	1.8
Total	947	100.0	336	100.0	611	100.0

Profile of Victim Officers

Eighty-six percent of the officers slain during the period 1965–1969 were white, 13 percent were Negro, and 1 percent were of other races. The median year of service was five and one-half. Fourteen percent of the officers killed had one year or less of law enforcement service. Thirty-nine percent had less than five years of service, 31 percent had five to ten years of service, and 30 percent had more than ten years service as law enforcement officers.

During the period 1970–1974, 88 percent of the officers killed were white, 11 percent were Negro, and 1 percent were of other races. The median years of service was four and one-half. Fourteen percent of the victim officers had one year or less of service, 48 percent had less than five years of service, 27 percent had five to ten years of service, and 25 percent over ten years of service.

For the entire ten-year period, 1965–1974, 87 percent of the victim officers were white, 12 percent were Negro, and 1 percent were of other races. The median year of law enforcement service for the entire period was five. Fourteen percent had one year or less of service, 45 percent had less than five years, 28 percent had five to ten years, and 27 percent had over ten years of service.

Profile of Victim Officers

Law enforcement officers	1965–74	1965–69	1970–74
Percent white	87	86	88
Percent Negro	12	13	11
Percent other race	1	1	1
Median years of service	5	5½	4½
Percent with 1 year or less service	14	14	14
Percent with less than 5 years service	45	39	48
Percent with 5 to 10 years of service	28	31	27
Percent over 10 years of service	27	30	25

Types of Assignment

Patrol duties within law enforcement organizations are the most hazardous type of assignment for officers. The patrol officer is frequently in contact with suspicious or dangerous individuals during the course of these duties. Thus, each of these situations constitutes a threat to the officer's personal safety. The patrol officer is readily identifiable because of his uniform and/or patrol vehicle. He cannot hide his presence or official capacity and frequently must determine quickly and accurately if a person is involved in a criminal act. If the suspect constitutes a danger to the officer's personal safety, he must afford himself reasonable protection. The patrol officer places himself in a variety of dangerous situations by reacting to circumstances as they occur without the benefit of detailed information or planning. He often risks attack through frequent encounters with criminal offenders at or near crime scenes. These perils are substantiated by the fact that officers assigned to patrol duty are the most frequent targets of the police killer. Law enforcement officers assigned in other capacities are confronted with equally tense and dangerous types of situations while performing their duties but not with the same frequency.

Law Enforcement Officers Killed—Percentage of Victim Officers Assisted, 1965–1974

Type of activity	Years	Type of assignment of victim					
		1-man vehicle	Percent assisted	Foot patrol	Percent assisted	Detective or special assignment	Percent assisted

Traffic pursuits and stops	1965–1969	13	4	8		1	
	1970–1974	79	18	61			

Eighty-seven patrol officers were slain in 1974. Eighty-three of these officers were assigned to patrol vehicles and four were foot patrolmen. Twenty-nine officers were detectives or officers on special assignments. In the highest tradition of the law enforcement profession, 16 officers, while in an off-duty status, were taking appropriate police action concerning crimes committed in their presence when they were slain. Nine of the off-duty officers were killed by persons they encountered during the commission of a robbery or while in pursuit of robbery suspects. During the period 1965–1974, 67 percent (or 634) of the 947 officers slain were assigned to patrol duties.

In 1974, 51 of the on-duty officers were alone and unassisted when killed. During the period 1965–1974, 35 percent (or 330) of the officers were alone and unassisted when they gave their lives for the communities they were sworn to protect. The preceding tables set forth the types of assignment and circumstances involved in connection with the killings of officers during the periods 1965–1969 and 1970–1974.

Time of Deaths

In 1974, July was the most dangerous month for law enforcement officers. During this month, 16 officers were feloniously killed.

Saturday was the most dangerous day of the week for law enforcement officers in 1974. During the period 1965–1974, 153 officers were killed on Friday, 146 on Saturday, 139 on Sunday, 139 on Monday, 134 on Thursday, 128 on Wednesday, and 108 on Tuesday.

During the period 1965–1974, 68 percent of all killings of law enforcement officers occurred between 4:00 p.m. and 4:00 a.m. The most dangerous times were between 10:00 p.m. and 11:00 p.m. when 88 officers were slain and from 1:00 a.m. to 2:00 a.m. when 86 officers were killed.

Persons Charged

Law enforcement agencies cleared 119 of the 132 killings that occurred in calendar year 1974. One hundred sixty-eight persons were identified in connection with these crimes. Fifty-two percent of the persons identified were white, 47 percent Negro, and 1 percent other races.

Profile of Persons Identified

Persons charged	Total	Percent of persons charged	1965–1969	Percent	1970–1974	Percent
Total	1,330	100	448	100	882	100
Under age 18	92	7	34	8	58	7
From 20 to 30 years of age	741	56	225	50	516	59
Male	1,279	96	435	97	844	96
Female	51	4	13	3	38	4
White	622	47	234	52	388	44
Negro	699	52	213	48	486	55
Other race	9	1	1	------	8	1
Prior criminal arrest	1,022	77	340	76	682	77
Convicted on prior criminal charge	761	57	272	61	489	55
Prior arrest for crime of violence	548	41	187	42	361	41
Convicted on criminal charges—granted leniency	468	35	162	36	306	35
On parole or probation at time of killing	211	16	72	16	139	16
Arrested on prior murder charge	50	4	11	2	39	4
Prior arrest on narcotic drug law violation	200	15	37	8	163	18
Prior arrest for assaulting policeman or resisting arrest	127	10	29	6	98	11
Prior arrest for weapons violation	280	21	67	15	213	24

During the period 1965–1974, 947 officers were slain; 1,330 individuals were identified and charged, clearing 95 percent of these killings. Seventy-seven percent of the persons had prior arrests for criminal charges, and 57 percent of the individuals had been convicted of those charges. Forty-one percent had prior arrests for violent types of crime such as murder, rape, armed robbery, aggravated assault, etc. Sixty-one percent of those who had previously been convicted on criminal charges were granted parole or probation. Sixteen percent of the persons identified were on parole or probation when an officer was killed. Fifteen percent of the individuals had a prior arrest for a narcotics charge and 10 percent had prior arrests for police assault.

Ninety-six percent were male and 4 percent female. During this ten-year period, 47 percent of the persons identified were white, 52 percent Negro, and 1 percent other races.

In the period 1961–1972, 1,224 known persons were involved in connection with the killing of 878 law enforcement officers. One hundred fifty-four subjects, or 13 percent, were justifiably killed at the scene of the crime or soon thereafter. Thirty-one individuals committed suicide, and 14 subjects escaped apprehension at the time of the incidents. A total of 1,025 individuals, were arrested and charged in connection with the killings of these law enforcement officers. There were 654 offenders found guilty of murder. Available court disposition data regarding the offense related to the officers' deaths disclose that 99 were sentenced to death, 335 were sentenced to life imprisonment, 215 received prison terms ranging from one to 1,000 years, and five offenders received probation. Seventy-nine offenders were found guilty of lesser offenses such as manslaughter, assault, etc. Sixty-four offenders were found guilty of other crimes such as robbery, burglary, etc., committed when the murders occurred. One hundred forty-one individuals were found not guilty. Further, 47 individuals were committed to mental institutions and twelve persons died while awaiting trial.

Disposition of Persons Involved in Murders of Law Enforcement Officers, 1961–1972

	Total	Percent distribution
Known persons	1,224	100
Fugitives	14	1
Justifiably killed	154	13
Committed suicide	31	2
Arrested and charged	1,025	84
Arrested and charged	1,025	100
Guilty of murder	654	64
Guilty of lesser offense related to murder	79	8
Guilty of crime other than murder	64	6
Acquitted or otherwise dismissed	141	14
Committed to mental institution	47	4
Case pending	28	3
Died in custody	12	1

In 1974, 23 subjects were justifiably killed at the scene of the police killing or soon thereafter, and eight subjects committed suicide. For the period 1965–1974, 176 assailants were killed at the crime site or within a short time after the officer was killed, 33 committed suicide shortly after the killing, and eleven died from other causes.

The persons identified ranged in age from 13 to 82. The median age of these individuals was 24 years. Fifty-six percent were between the ages of 20 and 30. Seven percent (or 92) were under the age of 18, and 20 was the most common age of the persons identified. In 1974, the 168 individuals identified with the killings of law enforcement officers had a median age of 24. Fifty percent of these persons were between the ages of 20 and 30. Ten of the individuals identified were under the age of 18. The most common age of the persons identified in 1974 was 25.

Geographic Locations

One hundred twenty-six of the 132 officers slain during 1974 were from 100 different local, county, and state law enforcement agencies in 32 states and the District of Columbia. Four officers from Puerto Rico and two United States Customs Service Officers were also killed. Among the agencies, the Chicago, Illinois, Police Department ranked highest with six officers slain in 1974. The Baltimore, Detroit, and New York City Police Departments followed with four officers slain in each agency.

Among the states, Illinois and Michigan ranked highest with eleven officers killed in each state. The states of California, Florida, New York, and Texas followed with nine officers slain in each state.

ASSAULTS ON LAW ENFORCEMENT OFFICERS

The following information is based on a detailed monthly collection of data in the Uniform Crime Reporting Program regarding the problem of assaults on local, county, and state law enforcement officers in this Nation. The large number of reported assaults on sworn officers is in part due to a prevalent attitude of disrespect for law enforcement in certain elements of our society.

The uniformed officer is the target of persons with real or imagined grievances against the "system." He also is, in many instances, the first person to render aid to mentally deranged individuals, to calm disturbances and quarrels, to offer protection to those threatened, or to rescue those in peril. The officer is the active representative of a society whose members too often forget their individual responsibilities to their fellow human beings. In this role, he suffers a variety of unsolicited and undeserved abuse.

During 1974, 29,511 assaults on police were reported by 5,039 agencies covering an estimated population of 103,581,000. The rate of assaults on police for the Nation was 15 assaults per 100 officers for the year.

Activity of Police Officers at the Time of Assault

An examination of the activities of law enforcement officers at the time of the assaults (Table 68) discloses that the greatest number of assaults, 28 percent, were in responding to disturbance calls. The second highest incidence activity, 22 percent of the assaults, was "attempting arrests" other than burglary or robbery. Any officer who has answered disturbance calls remembers the situations when he became a substitute target in a husband and wife quarrel or an arbitrator in a customer-proprietor argument. The high incidence of assaults in these common and often repeated police activities should serve as an impetus for greater alertness to all police personnel. The officer must avoid becoming complacent in his pursuit of any type of police activity. The police administrator or command officer should consider procedures to afford the responding officer the fullest possible support in all activities no matter how menial or routine they might seem.

Weapons Used in Assaults on Police Officers

The distribution of weapons used to assault officers is shown by geographic division, population group, and types of activity in Tables 66 and 67. Nationwide, personal weapons such as hands, fists, feet, etc., were used in 81 percent of the assaults on officers in 1974. Firearms were used in 7 percent of the assaults, a knife or cutting instrument in 3 percent, and some other weapon in 9 percent of the assaults on law enforcement officers.

Type of Assignment

Of those officers assaulted in 1974, Table 71 shows the type of assignment of the officer assaulted as 37 percent in two-man vehicles, 41 percent in one-man vehicles, 7 percent on detective or special assignment, and 14 percent in other assignments. In the highest assault incidence activity of police responding to disturbance calls, 46 percent of the victims were in two-man vehicles, 46 percent in one-man vehicles, 3 percent in detective or special assignment, and 5 percent in other assignments. The vehicle patrol officer is the victim of assault in 79 percent of the total assaults on police.

Injuries to Law Enforcement Officers

Assaults on officers resulted in 39 cases of serious personal injury to every 100 officers assaulted. The rates (Table 65) showed assault with injury to 9 officers per 100 in the New England division as contrasted with 3 per 100 in the East South Central division. The national rate of injuries to law enforcement officers was 6 per 100 officers. Cities of 100,000 to 250,000 inhabitants had the greatest rate of assault with injury with 9 per 100 and sheriffs and county police departments had the lowest rate with 2 per 100.

Time of Assault

Assaults on officers by time and population group are set forth in Table 69. Approximately one-half of the assaults on officers occurred during the hours from 8:00 p.m. to 2:00 a.m. The period with greatest incidence was from 10:00 p.m. to midnight. More than 17 percent of the assaults were recorded for this two-hour period.

Clearances in Assaults on Police

Nationwide in 1974, 92 percent of police assaults were cleared by arrest. In cities over 250,000, this clearance percentage was highest of any population group with more than 94 percent being cleared. Assaults of police in disturbance matters were cleared at the rate of 97 percent in cities over 250,000.

By police activity, the highest clearance rate for all agencies was 94 percent, which occurred in assaults on officers who were responding to disturbance calls. Ambush attacks accounted for the lowest clearance rate with 69 percent. Table 72 shows the percentage of assaults cleared by type of activity and population group.

LAW ENFORCEMENT EMPLOYEE TABULATIONS

This section contains tables relating to law enforcement personnel. Figures showing law enforcement strength by number of full-time officers and civilian employees are based on national averages. These figures should not be interpreted as indicating recommended or desirable police strength. Adequate law enforcement requirements for a specific place can only be determined following careful study and analysis of the local situation together with a thorough evaluation of the numerous factors which affect police needs.

Two tables containing employee rates are set forth. In the first, total employees including civilian personnel are used; whereas, in the second table, only sworn personnel are used to compute rates.

The law enforcement employee rate ranges in Table 56, which include civilians, show the interquartile range between the upper limits of the lowest quartile and the lower limits of the highest quartile. In other words, 50 percent of the cities shown in each population group and geographic division have police strength within the rate ranges shown. By arraying rates in this manner, extremes are eliminated.

In Table 57, where rates are published for police officers, complete rate ranges are provided as supplemental data for those who may be interested in using these figures to make limited comparisons.

Statistical data indicating the percent distribution of police employees by sex, including civilian personnel, are included in Table 58.

Three tables report figures relating to patrol activity by population groups and shift assignments.

Personnel strength for reporting state police and state highway patrol organizations is recorded in one table. This table is designed to show, by state, the number of miles of state and Federal highway per sworn employee, as well as the number of registered vehicles per officer. These rates are only a rough yardstick as to comparative workload and personnel strength because of widely differing functions and other factors. The wide variations in the numbers of sworn and civilian personnel among the various states can be accounted for in part by the differences in responsibilities assigned to the departments. It is pointed out, for instance, that state police generally are responsible not only for traffic patrol, but also conduct a major portion of the criminal investigative work in the unincorporated areas of the states. On the other hand, the activities of the state highway patrol organizations for the most part are limited to traffic and highway patrol, which include handling all types of crime which come to their attention during the performance of their patrol functions. Many of these state highway patrol groups also are authorized to and do participate in criminal investigative work when requested to do so by city departments or sheriffs' offices.

The annual collection of law enforcement employee data provides personnel counts, sex of employees, and whether the employee is sworn or civilian. Data with respect to officers killed in the line of duty is obtained throughout the year with use of a special questionnaire. Some data relative to police killings and assaults are presented in this section of this publication. Employee counts for individual agencies are presented in tabular format in this section.

Table 56.—*Full-Time Law Enforcement Employees,*[1] *October 31, 1974, Number and Rate per 1,000 Inhabitants by Geographic Divisions and Population Groups*

[1974 estimated population]

Geographic division	TOTAL (6,771 cities, population 136,064,000)	Population Group
